

2013 CAP TODAY Article Index

Note: This index does not cover the CAP TODAY “Marketplace” or “Abstracts” columns.

AACC meetings

How anticoags work, and what that means for labs, 01/13:32

Latest anticoagulants—nuts and bolts for labs, 02/13:05

What happened when lab set sights on parasites, 03/13:26

At the AACC show, 09/13:74

Keys to curbing tube interference with test results, 11/13:05

Finding and fixing large-scale laboratory errors, 12/13:34

Accountable care organizations (ACOs)

Tucking pathology incentives into the ACO model, 06/13:60

AIDS/HIV/other bloodborne diseases

Algorithm for HIV testing detects more cases, more quickly, 12/13:01

American Board of Pathology

MOC:PQRS incentive: what it is, how to earn it, 09/13:36

AMP molecular case reports

Multilocus sequencing for rapid identification of molds, 02/13:42

Importance of screening for Lynch syndrome in patients with EC,
08/13:72

aCGH as a diagnostic aid in a childhood Spitzoid melanoma, 09/13:46

Anticoagulants

How anticoags work, and what that means for labs, 01/13:32

Latest anticoagulants—nuts and bolts for labs, 02/13:05

Antimicrobial susceptibility testing/resistance

Triple play in lab’s MALDI-TOF efforts, 01/13:01

Antiviral therapy/Antiviral drug testing resistance

HCV, CMV viral load – treatment, testing, timing, 04/13:01

AP tracking systems

AP tracking: an eagle eye on blocks and slides, 02/13:01

Automation

AP tracking: an eagle eye on blocks and slides, 02/13:01

Biomarkers

In predicting CKD risk, eGFR better when based on cystatin C, 11/13:01

Blood/coagulation/hematology

How anticoags work, and what that means for labs, 01/13:32

Latest anticoagulants – nuts and bolts for labs, 02/13:05

Hemolysis – can better processes add up to millions?, 02/13:56

Ways to move quickly on bloodstream infection, 10/13:74

Hematology lineup gets year-end look, 12/13:10

Blood banking/transfusion

Policing blood use pays off for Allina Laboratories, 03/13:54

Poor testing, dosing dog fetomaternal bleeds, 09/13:01

Challenge and change in blood bank systems marketplace, 09/13:16

Breast cancer/breast health

New guideline takes on tough HER2 cases, 10/13:01

Cancer

New guidance on lung cancer testing, 04/13:01

Molecular clonality testing for lymphoma, 05/13:01

Managing abnormal screening results: highlights of new guidelines, 08/13:52

aCGH as a diagnostic aid in a childhood Spitzoid melanoma, 09/13:46

ALK-positive NSCLC – patient's story opens eyes, 09/13:58

New guideline takes on tough HER2 cases, 10/13:01

No worries with new cancer biomarker templates, 10/13:57

HPV a game changer in head, neck tumors, 12/13:01

CAP '12 meeting

How anticoags work, and what that means for labs, 01/13:32

Latest anticoagulants—nuts and bolts for labs, 02/13:05

CAP '13 meeting

Awards, honors given for sterling service, 11/13:74

CAP accreditation/checklists/protocols

Missing transcripts, diplomas snag labs, 04/13:01

For prenatal NGS labs, new accreditation requirements, 09/13:05

No worries with new cancer biomarker templates, 10/13:57

CAP programs/products/services (see also Q-Probes)

Order more tests? With diabetes, answer may be 'yes,' 03/13:03

Yeast, molds, and cell types in 2 benchtop guides, 04/13:05

New programs next year in gyn, nongyn cytopathology, 11/13:80

Cardiovascular disease/cardiac markers

Twilight zone for CVD risk markers?, 02/13:01

Heart failure high-wire act, 07/13:01

Centers for Medicare & Medicaid Services

Heart failure high-wire act, 07/13:01

On cuts and consequences, pathologists make their case, 10/13:05

Chemistry testing (see also Immunohistochemistry)

What happened when lab set sights on parasites, 03/13:26

Commentary

A pathologist's observations about in-office AP labs, 09/13:52

Cystatin C

In predicting CKD risk, eGFR better when based on cystatin C, 11/13:01

Cytopathology and More

Endometrial cells in Pap tests—when are they significant?, 01/13:36
Screening and dotting digital/virtual slides: A new challenge, 01/13:42
New year, new online program: Pap Education Digital, 01/13:46
Touch Imprint/Crush Preparation—a new SAM course, 01/13:48
Know where the deficiencies and dust hide, 05/12:24
Pathology for the public—a small cascade of realities, 05/13:24
Interrater agreement of anal cytology, 05/13:30
Cytologic-histologic correlation: And the answer is. . ., 08/13:52
Managing abnormal screening results: highlights of new guidelines, 08/13:52

Cytopathology/histology (see also Cytopathology and More)

New programs next year in gyn, nongyn cytopathology, 11/13:80

Diabetes

Order more tests? With diabetes, answer may be 'yes,' 03/13:03

Drug treatments/dosing

ALK-positive NSCLC—patient's story opens eyes, 09/13:58

Executive War College

For labs, opportunity knocks as wallets close, 8/13:12

Fetomaternal hemorrhage

Poor testing, dosing dog fetomaternal bleeds, 09/13:01

From the President's Desk

New eBook tells our varied stories, 01/13:11
Transformational practice—2 in spotlight, 02/13:11
Look to pathways for opportunities, 03/13:11
At CAP '13, countless ways to connect, 04/13:11
Next-generation communication, 05/13:11
Now and Future Policy Agenda, 06/13:11
Inclusion woven into our fabric, 07/13:11
Workforce advocacy: everyone's job, 08/13:11

It's our teammates who matter most, 09/13:11
Telling our story right from the start, 10/13:11
PT for the passionate and the savvy, 11/13:11
All systems go, and those who make it so, 12/13:09

Gene patents

Expressions follow SCOTUS gene ruling, 07/13:01
AMP v. Myriad Genetics: the end of the beginning, 07/13:05

Genetics/genetic testing (see also Next-generation sequencing)

'Extra' genetic info—too much, too quickly?, 10/13:01
Next-gen sequencing now: a restless wave, 11/13:01

Genomics

'Extra' genetic info—too much, too quickly?, 10/13:01

Glucose/insulin/blood sugars

An uneasy dance with POC glucose in the ICU, 10/13:01
Dropping the ball on critical value POC glucose results?, 12/13:05

Government reimbursement

MOC:PQRS incentive: what it is, how to earn it, 09/13:36

Health care reform

Heart failure high-wire act, 07/13:01

Health care reimbursement

For labs, opportunity knocks as wallets close, 08/13:12
On cuts and consequences, pathologists make their case, 10/13:05

Hemolysis

Hemolysis—can better processes add up to millions?, 02/13:56

Hepatitis

HCV, CMV viral load—treatment, testing, timing, 04/13:01

HER2

New guideline takes on tough HER2 cases, 10/13:01

Human papillomavirus

Houston study augurs possible shift in hrHPV genotypes, 03/13:01

HPV a game changer in head, neck tumors, 12/13:01

Infection control

New attention on POC device disease transmission, 04/13:34

Ways to move quickly on bloodstream infection, 10/13:74

Influenza

Rx for optimizing rapid flu test performance, 01/13:01

Sizing up 'mega' multiplex panels for respiratory viruses, 05/13:03

Keeping an eye on H7N9, and learning from the past, 06/13:05

FDA, CDC, and tests steer flu Dx into new season, 12/13:01

Information systems, software technologies (see also Automation)

Annual lineup of anatomic pathology systems, 02/13:22

Anatomic pathology computer systems, 02/13:23

Middleware takes on molecular testing and more, 03/13:32

Middleware systems, 03/13:36

In EHR world, LPL software still has its place, 04/13:12

Laboratory-provider links software, 04/13:18

Views from the inside—the latest in lab billing software, 05/13:48

Billing/accounts receivable/RCM systems, 05/13:53

Who's who, what's what? Thoughts on positive patient ID, 07/13:20

Positive patient identification products, 07/13:24

Toolkit lets labs make the case for the right LIS, 08/13:01

Challenge and change in blood bank systems marketplace, 09/13:16

Blood bank information systems, 09/13:20

Juggling IT demands—labs, vendors open up, 11/13:14

Laboratory information systems, 11/13:23

Instrumentation/instrument product guides

In coag, all eyes on new anticoagulants and new systems, 01/13:12

Coagulation analyzers, 01/13:14
Automation solutions a salve for labs of all sizes, 02/13:67
Laboratory automation systems and workcells, 02/13:69
Up next: Inform updates, flexible connectivity, and a next-gen system, 03/13:12
Bedside glucose testing systems, 03/13:12
It's here: whole slide imaging validation, 05/13:01
Coagulation analyzers—point of care, self-monitoring, 05/13:12
Same, fewer, small, and single—companies in step with latest needs, 05/13:12
Immunoassay analyzer market: more tests, tools, systems, 06/13:12
Automated immunoassay analyzers, 06/13:18
Updates and upgrades, 07/13:42
Chemistry analyzers for mid- and high-volume laboratories, 07/13:42
Blood gas analyzers—new tests, new features, 08/13:15
In vitro blood gas analyzers, 08/13:16
Chemistry analyzers (for low-volume laboratories), 08/13:35
Molecular testing platforms a land of plenty, 10/13:22
Automated molecular platforms, 10/13:24
Next-generation sequencing instruments, 11/13:70
Hematology lineup gets year-end look, 12/13:10
Hematology analyzers, 12/13:12

ISO standards

At Henry Ford, 36 lab sites now under ISO umbrella, 11/13:50

Kidney disease/kidney injury (see also Estimated glomerular filtration rate)

In predicting CKD risk, eGFR better when based on cystatin C, 11/13:01

Laboratory errors

Finding and fixing large-scale laboratory errors, 12/13:34

Laboratory profiles

At Henry Ford, 36 lab sites now under ISO umbrella, 11/13:50

Laboratory reference materials

Steep climb to suitable reference standards, 02/13:01

LAW profile

New connectivity standards nearly ready to roll, 11/13:102

Legal issues/actions (see also Medical mistakes)

Expressions follow SCOTUS gene ruling, 07/13:01

AMP v. Myriad Genetics: the end of the beginning, 07/13:05

Risk, compliance, pay—a juggling act for labs, 08/13:01

Letters

Urine cultures, 09/13:12

Setting the bar, 09/13:14

In-office AP laboratories, 10/13:08

Fetomaternal hemorrhage, 10/13:11

In-office AP laboratories, 11/13:08

Proficiency testing, 12/13:09

Lung cancer

New guidance on lung cancer testing, 04/13:01

ALK-positive NSCLC—patient's story opens eyes, 09/13:58

Lynch syndrome

Importance of screening for Lynch syndrome in patients with EC,
08/13:72

Mass spectrometry

Triple play in lab's MALDI-TOF efforts, 01/13:01

Checklists 2013: newborn screening and MALDI-TOF, 08/13:05

Medical mistakes (see also Legal issues/actions and Laboratory errors)

Finding and fixing large-scale laboratory errors, 12/13:34

Medicare/Medicaid

MOC:PQRS incentive: what it is, how to earn it, 09/13:36

On cuts and consequences, pathologists make their case, 10/13:05
2014 Medicare physician fee schedule relative value units, 12/13:54

Microbiology

Triple play in lab's MALDI-TOF efforts, 01/13:01
Microbiology QA, measure for measure, 08/13:01
Checklists 2013: newborn screening and MALDI-TOF, 08/13:05
Ways to move quickly on bloodstream infection, 10/13:74
Adventures in culturing—five micro lab tales, 10/13:80
What's needed, what's not?, 11/13:01

Molds

Yeast, molds, and cell types in 2 benchtop guides, 04/13:05

Molecular pathology/diagnostics (see also Polymerase chain reaction technology)

Building the case for PGx testing, 01/13:01
Multilocus sequencing for rapid identification of molds, 02/13:42
Molecular walk-through for CRC testing, 03/13:01
New guidance on lung cancer testing, 04/13:01
HCV, CMV viral load—treatment, testing, timing, 04/13:01
Molecular clonality testing for lymphoma, 05/13:01
With molecular testing, better infection control, 09/13:01
ALK-positive NSCLC—patient's story opens eyes, 09/13:58
Molecular testing platforms a land of plenty, 10/13:22
Next-gen sequencing now: a restless wave, 11/13:01

Newborn screening

Checklists 2013: newborn screening and MALDI-TOF, 08/13:05

Next-generation sequencing/Sanger sequencing

For prenatal NGS labs, new accreditation requirements, 09/13:05

Next-gen sequencing now: a restless wave, 11/13:01

Obituary

In Memoriam Lee VanBremen, PhD, 1938-2012, 02/13:12

Parasites

What happened when lab set sights on parasites, 03/13:26

Pathology incentives

Tucking pathology incentives into the ACO model, 06/13:60

Pathology reports

What's needed, what's not?, 11/13:01

Payment issues

Heart failure high-wire act, 07/13:01

On cuts and consequences, pathologists make their case, 10/13:05

Pharmacogenomics

Building the case for PGx testing, 01/13:01

Whole exome sequencing and pharmacogenomics, 01/13:30

Physician office laboratories

A pathologist's observations about in-office AP labs, 09/13:52

Point-of-care testing/guidelines/standards

Missing transcripts, diplomas snag labs, 04/13:01

New attention on POC device disease transmission, 04/13:34

An uneasy dance with POC glucose in the ICU, 10/13:01

Dropping the ball on critical value POC glucose results?, 12/13:05

Polymerase chain reaction (PCR) technology

Molecular clonality testing for lymphoma, 05/13:01

Positive patient identification

Who's who, what's what? Thoughts on positive patient ID, 07/13:20

Prenatal screening

Next-gen arrives for next (prenatal) generation, 07/13:01

For prenatal NGS labs, new accreditation requirements, 09/13:05

Put it on the Board

Genome sequencing in recurrent triple-negative breast cancer, 01/13:78

NIH grant for resident genomic pathology curriculum, 01/13:78

Gene signature predicts response to cancer drugs, 01/13:78

Molecular subtyping in breast cancer, 01/13:78

An estimate of specimen identification error, 02/13:114

Cepheid CT/NG test classified as moderate complexity, 02/13:114

ARUP to offer Oncimmune early-stage lung cancer test, 02/13:114

Hologic test cleared for detecting GI pathogens, 02/13:114

IntelligentMDx to develop tests for Qiagen platform, 02/13:114

Latest lab vacancy data in, 02/13:114

FDA clears ALK automated gene scanner, 03/13:78

Precision medicine center at Weill Cornell, NY-Presbyterian, 03/13:78

Sequence-based system cleared for HLA typing, 03/13:78

Abbott to collaborate on companion CLL test, 03/13:78

Cepheid, OHSU to develop oncology assays for Xpert, 03/13:78

Clariant adopts Qiagen KRAS, 03/13:78

Test could reduce number of repeat biopsies, 03/13:78

Ventana, Biocare sign p63 license agreement, 03/13:78

ACMG issues guidance on incidental findings, 04/13:90

FDA OKs Quidel C. diff assay with Life Tech PCR, 04/13:90

ASCP, API forge alliance, 04/13:90

AACC names Kreizman CEO, 04/13:89

Whole-slide imaging via the cloud, 04/13:89

CPT, Z-Code identifiers to be mapped, 04/13:89

Roche's Kadcyra for breast cancer approved, 04/13:89

FDA clears urine analyzer, 04/13:89

Omnyx digital pathology OK'd for routine use in Canada, Europe, 05/13:90
PCR platform kit cleared for H7N9, 05/13:90
CollabRx forms Pan Cancer molecular oncology editorial board, 05/13:90
'Time for omic ancillary systems,' 05/13:90
Thermo Fisher to acquire Life Tech, 05/13:90
First next-generation sequencing assay for GE Healthcare, 05/13:90
FDA clears BD Diagnostics' C. diff assay, 05/13:90
Foundation Medicine, Sloan-Kettering to co-develop test for hematologic cancers, 05/13:90
Mahul Amin named editor-in-chief of AJCC Cancer Staging Manual, 06/13:102
CollabRx, GeneInsight to create genetic sequencing service, 06/13:102
Aperio ePathology approved for routine diagnostic use in Canada, 06/13:102
From Transgenomic, RAScan mutation test for metastatic CRC, 06/13:102
FDA OK for bioMerieux's THxID-BRAF, 06/13:102
Commission advises scrapping SGR, 06/13:102
Abbott's HCV genotype test approved, 07/13:110
UPMC's 'big data' work takes shape, 07/13:110
FDA clears BioFire's blood culture ID panel, 07/13:110
At Methodist in Houston, a germ killer moves in, 07/13:110
Leica unveils Aperio AT2, 07/13:110
FDA approves Therascreen EGFR PCR kit as companion test for Gilotrif, 08/13:90
A guide to using the microbiology lab, 08/13:90
Leica Biosystems acquires Kreatech, 08/13:90
Life Tech to collaborate with Merck Serono, 08/13:90
MDxHealth teams with HistoGeneX, 08/13:90
FDA clears Vitek MS, 09/13:106
Rapid pathogen ID study wins pharmacy innovation award, 09/13:106
ACOs and the threat of liability, 09/13:106
LifeTech names TriCore an NGS Center of Excellence, 10/13:98
In Ontario, success and satisfaction with synoptic reports, 10/13:98
Medtronic seeks code for MiniMed 530G, 10/13:98
Ventana ALK IHC assay approved for Xalkori in China, 10/13:98

Life Tech releases EZQC Online, 10/13:98
Beckman's AccuTnl+3 cleared for use on UniCel Dxl series, 10/13:98
Dako, Omnyx launch digital solution, 10/13:98
Myriad's myRisk Hereditary Cancer improves colon cancer testing, 11/13:114
Siemens offers HIV combo assay, 11/13:114
MDxHealth's MGMT test in NCCN guideline, awarded tier 1 code, 11/13:114
Quest acquires ConVerge, 11/13:114
Illumina to acquire NextBio, 11/13:114
Qiagen, Clovis to co-develop companion diagnostic, 11/13:114
PDI and Transgenomic team up, 11/13:114
First premarket clearance for next-gen sequencing system, 12/13:70
Right test or wrong? Study parses test utilization, 12/13:70
Xalkori granted regular FDA approval, 12/13:70
New use for Siemens Tissue Preparation Solution, 12/13:70
Microarray to optimize antimicrobial therapy, 12/13:70

Q&A

Do you have information that pertains to the two-hour glucose tolerance test after ingestion of a 75-g glucose beverage and studies on an alternative to the 75-g beverage? (Foley), 01/13:69
Is it appropriate in a medical laboratory to reuse tourniquets? Does the CAP have any related requirements? (Esposito, Jones), 01/13:69
What are the limitations of using myoepithelial markers in diagnostic breast pathology? (Simpson), 02/13:103
How does the CAP recommend handling the situation where a pediatrician requests that we release a K+ result on a hemolyzed specimen? (Faix), 02/13:103
What is the recommended use of p16 immunostaining as an adjunct diagnostic biomarker in HPV-associated lesions of the lower anogenital tract? (Moroz), 03/13:66
Can StatSpin-type centrifuges be used to spin coagulation samples? Is the speed and time for producing platelet-poor plasma for coagulation samples centrifuge specific? (Funk, Lippi, Favaloro), 03/13:67

In the POC test for determining PT and INR by fingerstick in a physician's office, are controls available for adequate QC determination? (Perry, Hamill), 04/13:76

The benefits of adding a pediatric cord blood bank collection unit to the labor and delivery unit of a hospital in Saint Thomas, VI (Rubinstein), 04/13:76

Precision/accuracy/normal range/patient sample/control testing for revalidating analyzers after a move (Killeen), 05/13:76

How should smudge cells present on peripheral smear review be handled in reporting results? (George), 05/13:76

Is there any lab procedure by which a specimen could be isolated to determine culture if a patient were infected with HIV? (Pandori), 06/13:88

If surgeons at a hospital use an outside pathology group, should the hospital's pathology group review the external findings to make sure they are in agreement before a surgical procedure is performed at the hospital? (Nakhleh, Branton), 06/13:88

Can you clarify the difference between the terms "optimization," "validation," and "verification" as used in immunohistochemistry? (Goldsmith), 07/13:99

Is there a published set of minimum standards that a laboratory information system or AP LIS must meet before it is put on the market? (Friedman), 07/13:100

What are considered best practices for tracking result trending in the lab? (Cembrowski), 08/13:79

Will reporting <10 ng/dL of testosterone be sufficient for clinicians to diagnose a child using the Advia Centaur assay? (Harowitz, Palmer-Toy), 08/13:79

Would a simple nasal swab stained for eosinophils help differentiate an allergic from an infectious etiology? (Procop), 08/13:80

The role of IgG4 immunohistochemical staining in testing for IgG4-related disease (Troxell), 09/13:95

Is the two-minute shutoff and 5 cc discard draw sufficient to ensure proper specimen integrity for a diabetic patient with a central venous line that has insulin in it? (Rosser), 09/13:95

Is it necessary to do parallel runs on a new lot of calibrators for a chemistry analyzer? (Baltaro), 09/13:95

Have studies evaluated the accuracy of a low platelet count via a manual dilution technique versus the many automated techniques, and is there value in performing manual platelet count? (Patel, Davis), 10/13:88

Do urinary eosinophils for diagnosing acute interstitial nephritis lack sensitivity and specificity? (Zwick), 10/13:89

Why do a full workup for identification and sensitivity on multiple positive blood culture bottles on the same patient, drawn on the same day? (Riedel), 11/13:98

With regard to fasting, what is the gold standard for lipid status assessment? (Remaley), 11/13:100

Verifying new lots of reagents by running two levels of quality control (Alter), 11/13:101

Is there an established guideline recommendation for the number of RBCs seen on CSF tube No. 4 before doing an additional count on tube No.1? (Etzell), 12/13:59

Would the D-dimer product provide our obstetricians with the same information as the FDP assay? (Chandler), 12/13:59

Can I replace the name of the intraoperative consultant pathologist with the name of the pathologist who verified the main report? (Mateski), 12/13:59

Quality assurance/quality control/quality improvement

Microbiology QA, measure for measure, 08/13:01

Cancelled lab tests—study analyzes why, 09/13:01

Q-Probes

Order more tests? With diabetes, answer may be 'yes', 03/13:03

Cancelled lab tests—study analyzes why, 09/13:01

Dropping the ball on critical value POC glucose results?, 12/13:05

Respiratory viruses/treatments

Sizing up 'mega' multiplex panels for respiratory viruses, 05/13:03

Screening tests

Algorithm for HIV testing detects more cases, more quickly, 12/13:01

Self-inspections

New push to strengthen interim self-inspections, 01/13:05

Sepsis

Sooner, smarter—new strategies against sepsis, 07/13:32

Shorts on Standards

New lot of secondary reference material, 02/13:41

Whole genome sequencing: reporting the needles found in other haystacks, 10/13:72

Specimen collection/ labeling/processing/rejection

Cancelled lab tests—study analyzes why, 09/13:01

Adventures in culturing—five micro lab tales, 10/13:80

Keys to curbing tube interference with test results, 11/13:05

Standard of care

Standard of care hits close to home, 05/13:01

Test development/management

Cancelled lab tests—study analyzes why, 09/13:01

Test tubes

Keys to curbing tube interference with test results, 11/13:05

Test utilization

How labs are taming test utilization, 06/13:01

Test utilization: a united front against waste, 07/13:72

Thyroid disease/testing

With NGS, new hope for managing thyroid nodules, 04/13:52

With TSH testing, no lack of discord, 06/13:01

Tuberculosis

TB or not TB? Newer assays settle in, 03/13:01

Urinalysis/Urinary tract infections

To reduce UTIs, one lab takes a long, wide look, 06/13:01

Whole slide imaging

It's here: whole slide imaging validation, 05/13:01

Miles away — whole slide imaging gets Canadian OK, 06/13:72
