

2014 CAP TODAY Article Index

Note: This index does not cover the CAP TODAY “Marketplace” or “Abstracts” columns.

AACC meetings

New push for standard approach to critical values, 09/14:56

At the AACC show, 09/14:92

American Board of Pathology

Testing the test—ABP administers pilot part 3 MOC exam, 02/14:82

American Society for Microbiology

Too few studies to steer test protocols for pediatrics, 08/14:05

AMP molecular case reports

Molecular assays in HIV-1 Dx and therapeutic monitoring, 05/14:42

Using molecular techniques to confirm donor-derived post-transplant lymphoproliferative disorder (diffuse large B-cell lymphoma of CNS), 06/14:73

Molecular techniques in a case of concurrent BCR-ABL1-positive CML and CMML, 11/14:52

Amyloid/amyloidosis

In amyloidosis, timely diagnoses lag therapy gains, 07/14:79

Analyzers (see Instrumentation/instrument product guides)

Anatomic pathology

With AP systems, sharing (data) is caring—and a trend, 02/14:36

Anemia

Anemia: classification challenge and clinical questions, 12/14:15

Appendix

Study hints at new directions on LAMNs, 08/14:01

Association for Molecular Pathology

Molecular assays in HIV-1 Dx and therapeutic monitoring, 05/14:42

Automated microscopy

In urinalysis, automated microscopy making the difference, 03/14:61

Automation

Labs weighing pros, cons of micro TLA, 01/14:01

Laboratory automation possibilities give lift to labs, 03/14:12

Microbiology automation: finding the right mix, 04/14:34

Seamless automation: within reach for AP?, 08/14:01

Autopsies

How high-tech approach may reshape the autopsy, 03/14:46

From chaos to order—and compassion—in autopsies, 11/14:05

Billing/revenue cycle management

Billing vendors adopt and adapt to boost clients' revenue, 05/14:10

Bioinformatics

NGS bioinformatics pipeline—worries and wish lists, 10/14:42

NGS informatics catching up to clinical demands, 11/14:01

Biorepositories

Biorepository book helps programs follow guidelines, 12/14:46

Biospecimens

Standardization of biospecimen collection using biospecimen kits,
12/14:48

Blood/coagulation/hematology

Anemia: classification challenge and clinical questions, 12/14:15

Blood banking/transfusion

Tuning in to hypotensive transfusion reactions, 04/14:03
For safety and savings, lab takes on transfusions, 07/14:62
AABB ramps up donor screening to help stem TRALI, 10/14:01
Massive transfusion: a question of timing, detail, a golden ratio, 12/14:01

Breast cancer/breast health

Breast cancer answers, short and long, 02/14:01

Cancer (see also Leukemia and Breast cancer/breast health)

MicroRNA markers show staying power, 03/14:01
Second act for HER2, in gastric cancers, 05/14:01
Unraveling metastasis with circulating tumor cells, 05/14:01
Data spark new directions in cervical cancer, 06/14:01
Cancer biomarker use varies widely, needs a 'broader view', 06/14:01
AML molecular testing a map with many paths, 07/14:01

CAP '14 meeting

21 honored for patient care, strategy, safety, and service, 10/14:92
How LIS tweaks can enhance efficiency, patient safety, 11/14:19

CAP accreditation/checklists/protocols

No ifs, ands, or buts on IHC assay validation, 03/14:01
Checklist changes put out fire (drills), for starters, 05/14:03

CAP Press

Biorepository book helps programs follow guidelines, 12/14:46
Standardization of biospecimen collection using biospecimen kits,
12/14:48

CAP programs/products/services

Is molecular AP testing in sync with guidelines?, 11/14:01
Evalumetrics—a performance measurement tool and more, 08/14:40

CAP TODAY webinars

Lab's respiratory panel found to curb antibiotic use, 01/14:03

Centers for Medicare & Medicaid Services

CAP proposals on IHC, PQRS accepted for Medicare in '15, 11/14:80

Circulating tumor cells

Unraveling metastasis with circulating tumor cells, 05/14:01

Competency assessment

Testing the test—ABP administers pilot part 3 MOC exam, 02/14:82

CPOE systems

Taking aim at overuse: daily labs, high-cost send-outs, 04/14:64

Critical values/critical results

New push for standard approach to critical values, 09/14:56

Cytopathology and More

Evidence emerging for HPV-negative cervical cancer, 01/14:41

Effectiveness of the HPV vaccine in Australia, 01/14:45

Rapid on-site evaluation—how practice varies, 05/14:29

Cytopathology at the tipping point, 05/14:29

Letter, 05/14:31

The Pap test under fire, 08/14:60

Of confusion, cost, and communication, 08/14:60

ATHENA design, data—and the FDA's decision, 08/14:64

Pap proficiency testing—for whom, when, and why, 08/14:66

Cytopathology/histology (see also Cytopathology and More)

In free CytoAtlas app, 750 images for 100+ diagnoses, 10/14:76

Data integration/data management

Big gain theory—data warehousing pays off, 11/14:01

Diabetes

Diabetes debate: HbA_{1c} or glucose?, 02/14:01

Ebola

Labs ramp up for Ebola patients, specimens, 12/14:01

Amid Ebola preparation, an EV-D68 outbreak, 12/14:53

Editorials of CAP president (see From the President's Desk)

Electronic medical record systems (EMRs)

Guidance aims for safer use of lab data in EHRs, 03/14:05

Encephalitis

In encephalitis case, next-gen sequencing is the star, 04/14:01

Enterprise data warehouse

Big gain theory – data warehousing pays off, 11/14:01

Evalumetrics

Evalumetrics—a performance measurement tool and more, 08/14:40

Executive War College

Where smart labs go when the money's gone, 08/14:01

Flow cytometry

Saving time on HLA testing's final compatibility check, 02/14:34

Fragile X syndrome

Getting to the point in fragile X syndrome, 01/14:01

From the President's Desk

In policy matters, no pause in the cause, 01/14:11

Seek and you will find: CAP services, 02/14:11

Turning data into care—lead the way, 03/14:11

Member survey meets our need to know, 04/14:09

Connect to colleagues, ideas at CAP '14, 05/14:09

With time, greater clarity on HPV screening, 06/14:09

Collaborating when and where it matters, 07/14:11

From representation to RUC, reasons to join AMA, 08/14:13

Premium PT—and more to come in 2015, 09/14:11

Building a quality tradition, 10/14:13

How we tell our story, 11/14:09

Are we there yet?, 12/14:11

Genetics/genetic testing (see also Next-generation sequencing/Sanger sequencing)

In encephalitis case, next-gen sequencing is the star, 04/14:01

NGS to detect oncogenes—sizing panels, reporting results, 06/14:32

NGS for determining the vaginal microbiome in clinical samples, 06/14:38

No surprises—one lab's approach to costly genetic testing, 09/14:72

Genomics

NGS to detect oncogenes—sizing panels, reporting results, 06/14:32

microRNAs entice as diagnostic key to multiple diseases, 06/14:54

Virus or bacterium? Gene expression may tell, 09/14:01

Molecular tumor boards: fixture or fad?, 10/14:01

Glucose/insulin/blood sugars

Diabetes debate: HbA_{1c} or glucose?, 02/14:01

Health care reimbursement

Lab gets a jump on pay-for-value world, 07/14:01

Heartland virus

Unwinding the mystery of Heartland virus disease, 07/14:05

HER2

Second act for HER2, in gastric cancers, 05/14:01

Histocompatibility

Saving time on HLA testing's final compatibility check, 02/14:34

Hospital-acquired infections

Pressure's on to halt nosocomial infections, 05/14:01

Human papillomavirus

2013 statement on human papillomavirus DNA test utilization, 02/14:78

Data spark new directions in cervical cancer, 06/14:01

Study: primary HPV test 'merits consideration', 09/14:01

Immunohistochemistry

No ifs, ands, or buts on IHC assay validation, 03/14:01

Infection control

Scoring against MRSA — studies shed light on what works, 08/14:76

Infectious disease

Labs ramp up for Ebola patients, specimens, 12/14:01

Study: elevated vancomycin MICs no cause for concern, 12/14:05

Amid Ebola preparation, an EV-D68 outbreak, 12/14:53

Influenza

Flu view — tests, predictions for the upcoming season, 10/14:60

Informatics/information technology (see also Automation; Information systems, software technologies)

IT drives clinical, financial gains in hospital labs, 02/14:59

How high-tech approach may reshape the autopsy, 03/14:46

With lab informatics, better to give than to receive, 03/14:56

Taking aim at overuse: daily labs, high-cost send-outs, 04/14:64

Seamless automation: within reach for AP?, 08/14:01

Full speed ahead through tight corners, 12/14:01

Information systems, software technologies (see also Automation)

With AP systems, sharing (data) is caring — and a trend, 02/14:36

Anatomic pathology computer systems, 02/14:41

Guidance aims for safer use of lab data in EHRs, 03/14:05

A lot to like about laboratory-provider links software, 04/14:14

Laboratory-provider links software, 04/14:15

Billing vendors adopt and adapt to boost clients' revenue, 05/14:10

Billing/accounts receivable/RCM systems, 05/14:16
Middleware systems, 06/14:12
Evalumetrics—a performance measurement tool and more, 08/14:40
Blood bank systems sport an assortment of solutions, 10/14:24
Blood bank information systems, 10/14:27
How LIS tweaks can enhance efficiency, patient safety, 11/14:19
Laboratory information systems, 11/14:26

Instrumentation/instrument product guides

Coagulation analyzers, 01/14:12
New analyzers, assays, controls, and PEP, 01/14:12
Bedside glucose testing systems, 02/14:20
Laboratory automation possibilities give lift to labs, 03/14:12
Laboratory automation systems and workcells, 03/14:16
Coagulation analyzers—POC, self-monitoring, 04/14:51
In vitro blood gas analyzers, 06/14:64
Chemistry analyzers for mid- and high-volume laboratories, 07/14:21
A POC blood glucose program turned upside down, 07/14:44
Latest lineup of chemistry analyzers for low-volume settings, 08/14:18
Chemistry analyzers (for low-volume laboratories), 08/14:19
QC, noise, stat time—those and other details for 62 analyzers, 09/14:12
Automated immunoassay analyzers, 09/14:12
Automated molecular platforms, 10/14:78
Next-generation sequencing instruments, 11/14:67
Full speed ahead through tight corners, 12/14:01
32 analyzers in focus, from menu to special features, 12/14:21
Hematology analyzers, 12/14:21

Lab-developed tests/homebrews

FDA's LDT proposal means 'whole new ballgame' for labs, 10/14:05

Lab test utilization management

Powering down on excessive test use, 02/14:01
Sin of omissions: when tests fly under the radar, 05/14:60
No surprises—one lab's approach to costly genetic testing, 09/24:72

Laboratory efficiency/cost-savings measures

Clinician-friendly tactics slash unwarranted testing, 01/14:56

Powering down on excessive test use, 02/14:01

A question of capital: Will lab purchasing take a U-turn?, 06/14:01

Slashing send-out costs with lab formularies, 07/14:01

For safety and savings, lab takes on transfusions, 07/14:62

Where smart labs go when the money's gone, 08/14:01

Laboratory profiles

A POC blood glucose program turned upside down, 07/14:44

For safety and savings, lab takes on transfusions, 07/14:62

No surprises—one lab's approach to costly genetic testing, 09/24:72

Laboratory purchasing/budgeting

A question of capital: Will lab purchasing take a U-turn?, 06/14:01

Legal issues/actions

PT referral rules bring regulatory relief for labs, 07/14:75

Letters

In-office AP laboratories, 01/14:06

Large-scale lab errors, 02/14:06

IHC coding changes, 02/14:08

HER2 testing guideline update, 04/14:09

Ordering prognostic studies, 04/14:12

CAP TODAY online, 04/14:12

Ignoring recommendations?, 05/14:31

Platelet clumping, 07/14:08

Epoc ad, 07/14:08

HPV primary screening, 11/14:09

Use HPV test in conjunction with Pap, 11/14:12

Genomic testing and the LIS, 11/14:12

TRALI, 11/14:14

Leukemia

AML molecular testing a map with many paths, 07/14:01

Medicare/Medicaid

Advocacy pays off, though 2014 CMS cuts will sting, 01/14:30

Medicare IHC change adds to administrative burdens, 02/14:05

CAP on rule to implement law: 'We will be there', 06/14:05

Proposed prostate biopsy policy could cut Medicare pay, 08/14:14

CAP proposals on IHC, PQRS accepted for Medicare in '15, 11/14:80

Microbiology

Labs weighing pros, cons of micro TLA, 01/14:01

Microbiology automation: finding the right mix, 04/14:34

MicroRNA markers

MicroRNA markers show staying power, 03/14:01

microRNAs entice as diagnostic key to multiple diseases, 06/14:54

Mobile app

In free CytoAtlas app, 750 images for 100+ diagnoses, 10/14:76

Molecular pathology/diagnostics (see also Polymerase chain reaction technology and AMP molecular case reports)

AML molecular testing a map with many paths, 07/14:01

Molecular tumor boards: fixture or fad?, 10/14:01

NGS bioinformatics pipeline—worries and wish lists, 10/14:42

Is molecular AP testing in sync with guidelines?, 11/14:01

From tumor board, an integrated diagnostic report, 12/14:54

MRSA screening/infection

Scoring against MRSA—studies shed light on what works, 08/14:76

Newsbytes

Why one pathologist champions social media, 01/14:68

CMS releases plan to extend meaningful use timeline, 01/14:68

Data Innovations acquires Dawning Technologies, 01/14:68

Aspyra offers updated version of CyberLab, 01/14:68

Patient information security for mobile devices, 01/14:68
New contracts for Voicebrook, 01/14:68
Orchard Software collaborates with Memorial Sloan-Kettering, 02/14:94
Sunquest releases new versions of products, 02/14:94
Public and private entities partner to assist with ICD-10, 02/14:94
Data Innovations adds functionality to middleware, 02/14:94
SCC software meets EHR certification criteria, 02/14:94
Voicebrook reports AP lab installations, 02/14:94
Digital imaging going strong but weaknesses persist, 03/14:81
Orchard Software releases enterprise-class LIS, 03/14:82
GE purchases API Healthcare, 03/14:82
Telcor POC software provides connectivity for cardiac testing, 03/14:82
CCHIT ends EHR certification, revamps strategic direction, 03/14:82
Viewics and Apollo add to client base, 03/14:82
CommonWell executing pilot phase of interoperability project, 04/14:76
Siemens debuts software for population health management, 04/14:77
ONC releases survey findings on electronic health information exchange, 04/14:77
Upcoming informatics meetings, 04/14:77
Google cloud platform supporting HIPAA, 04/14:77
How to avoid becoming a 'legacy system junkyard', 05/14:70
Federal report classifies health IT based on patient safety, 05/14:70
SBCNE adds email report delivery to AP system, 05/14:70
AHIMA concerned about EHR copy-and-paste functionality, 05/14:70
NovoPath debuts Web portal, 05/14:72
Data Innovations launches Laboratory Intelligence solution, 05/14:72
Making the most of big data no easy task, 06/14:85
Leica introduces software for secondary case review, 06/14:85
McKesson offering manages mobile devices, 06/14:85
GenoLogics releases new version of LIMS, 06/14:86
SCC lab system meets EHR certification criteria, 06/14:86
Sunquest announces installations, 06/14:86
The benefits of building versus buying lab software, 07/14:88
CDC report urges pathologist involvement in improving EHRs, 07/14:89
Speech-recognition product offers structured resulting, 07/14:89
FDA initiative simplifies access to health data sets, 07/14:90

Leica enhances mobile app, 07/14:90
Telcor POC system meets EHR certification criteria, 07/14:90
Advanced Data Systems EHR gains Quest certification, 07/14:90
Smartphone use in AP 'immature' but advancing, 08/14:90
Partnership creates graduate medical education clinical informatics curriculum, 08/14:91
New NovoPath feature speeds report generation, 08/14:91
CCHIT launches service for ONC testing and certification, 08/14:91
Atlas software receives EHR certification, 08/14:92
Telcor products compatible with Windows Server 2012, 08/14:92
Why LIS limitations shouldn't inhibit genomic testing, 09/14:102
Cerner to purchase Siemens' health IT business unit, 09/14:103
Brunston system provides patient access to test results, 09/14:103
Private equity firm buys Xifin, 09/14:103
Orchard releases new version of Copia integration engine, 09/14:103
GenoLogics introduces updated Clarity LIMS offering, 09/14:104
NovoPath announces support for Primera medical printers, 09/14:105
A conundrum: teaching pathology informatics to residents, 10/14:100
Cerner to take over health system's IT services, 10/14:101
New meaningful use rule offers flexibility, more time, 10/14:101
Sunquest and CellNetix announce collaboration, 10/14:102
Technidata introduces system to boost LIS performance, 10/14:102
GE to install telepathology network in Canada, 10/14:102
Software expands on 'what you see is what you get', 11/14:87
ONC unveils tool for sharing health information with patients, 11/14:87
Portal gives patients direct access to lab test results, 11/14:88
Xifin partners with SyTrue, 11/14:88
GenoSpace awarded grant for developing biorepositories, 11/14:88
NovoPath interfaces to Athenahealth EHR, 11/14:88
Why lab report formatting remains a work in progress, 12/14:68
Cerner offering free CommonWell services, 12/14:68
Apollo introduces app for smartphones and tablets, 12/14:68
Report analyzes value of anatomic pathology systems, 12/14:68
Atlas Medical issues new release of LabWorks, 12/14:69
Viewics expands presence at academic medical center, 12/14:69

Next-generation sequencing/Sanger sequencing

In encephalitis case, next-gen sequencing is the star, 04/14:01

NGS to detect oncogenes—sizing panels, reporting results, 06/14:32

NGS for determining the vaginal microbiome in clinical samples,
06/14:38

Virus or bacterium? Gene expression may tell, 09/14:01

NGS informatics catching up to clinical demands, 11/14:01

Office supply expenses

Pens, pencils, Post-its—setting out to save on supplies, 04/14:68

Pathology reports

Introducing patients to their pathology reports, 01/14:54

Pathology Informatics Summit 2014

With lab informatics, better to give than to receive, 03/14:56

Patient consults

Introducing patients to their pathology reports, 01/14:54

Patient ID systems/patient safety

Handling a reagent recall, step by strenuous step, 02/14:24

Payment issues

Advocacy pays off, though 2014 CMS cuts will sting, 01/14:30

Medicare IHC change adds to administrative burdens, 02/14:05

How a Maryland lab met fixed-budget test, 03/14:01

CAP on rule to implement law: 'We will be there', 06/14:05

Lab gets a jump on pay-for-value world, 07/14:01

Proposed prostate biopsy policy could cut Medicare pay, 08/14:14

Pediatrics

Too few studies to steer test protocols for pediatrics, 08/14:05

Physician fee schedule (see also Medicaid/Medicare)

Advocacy pays off, though 2014 CMS cuts will sting, 01/14:30

Medicare IHC change adds to administrative burdens, 02/14:05
Proposed prostate biopsy policy could cut Medicare pay, 08/14:14

Physician performance metrics

Evalumetrics—a performance measurement tool and more, 08/14:40

Point-of-care testing/guidelines/standards

How POC testing is pushing the envelope, 04/14:01

Polymerase chain reaction (PCR) technology

Lab's respiratory panel found to curb antibiotic use, 01/14:03

Proficiency testing

PT referral rules bring regulatory relief for labs, 07/14:75

Put it on the Board

Call for faster, simpler diagnostic tests for infectious diseases, 01/14:74

AMP statement on LDTs, 01/14:74

Detecting women at risk, 01/14:74

Patient-access rule creates opportunities, costs for labs, 03/14:90

Paris System for Urinary Cytopathology open for input, 03/14:90

NIH, industry, and nonprofits join forces, 03/14:90

Test reduces false-positive rate of fetal aneuploidy detection, 03/14:90

Third cervical cancer screening paradigm may be on the way, 04/14:86

An 'opt-out' update, 04/14:86

Leica, QualityStar team up, 04/14:86

FDA clears HSV 1 & 2 Direct, 04/14:86

Illumigene Pertussis has FDA OK, 04/14:86

FDA clears FilmArray GI Panel, 05/14:78

Major disruption ahead for labs, says industry analyst, 05/14:78

FDA clears Omnyx Manual Read of Digital HER2, 05/14:78

Direct Strep goes to market, 05/14:78
From IDL, prostate blood test now available, 05/14:78
What report says about PQRS and pathologists in 2012, 05/14:78
For trainees, information 'gaps are closing', 06/14:94
A special honor for a vision and the Vanderbilt team's feats, 06/14:94
Cancer care and patient demands, 06/14:93
FDA OKs Qiagen Therascreen *KRAS* to guide treatment, Artus *C. diff* kit, 06/14:93
Beckman Coulter's phi named in NCCN guidelines, 06/14:93
Ethics of laboratory billing at stake in AMA's code, 07/14:98
Innovators may find relief in FDA's medical device guidance, 07/14:97
Biocartis, Abbott to develop multiplex companion diagnostics, 07/14:97
Labs grapple with handing results directly to patients, 08/14:102
FDA's LDT framework draws mixed reviews, 08/14:102
Simple blood tests, colossal contrasts on price, 09/14:114
Respiratory panel improves outcomes, cuts costs, 09/14:114
Study: Many patients mystified by lab results, 09/14:114
Twitter touted as tool to sway minds, 10/14:110
Class II for Thermo's Ion PGM Dx, 10/14:109
Glucose meter cleared for critical care, 10/14:109
Beckman's Power Express lands 510(k), 10/14:109
Stago's D-dimer meets CLSI standard, 10/14:109
For Ebola cases, weighing broader, faster diagnostics, 11/14:94
LabCorp will buy CRO Covance for \$6.1 billion, 11/14:93
Chembio's POC HIV test lands CLIA waiver, 11/14:93
\$502 price for fecal DNA colorectal cancer test, 11/14:93
Biocare acquires CymoGen DX, 11/14:93
CMS will cover test for ER+ breast cancer recurrence, 11/14:93
Beckman, NEB automate NGS applications, 11/14:93
Crizotinib shrinks tumors in *ROS1*-positive NSCLC, 12/14:74
Forecast sees 6% IVD market growth, 12/14:73
Payers set higher bar for pricey new technology, 12/14:73
USPSTF: Scant support for routine vitamin D testing, 12/14: 73
Imaging IDs receptors for cancer treatment, 12/14:73
ARUP sponsors PLUGS, 12/14:73
Roche acquires Ariosa, 12/14:73

CE mark for Ortho's Vision, 12/14:73

Pap tests (see Cytopathology and More)

Q&A

How do you calculate the correction factor for blood drawn in an ACD tube? (Etzell), 01/14:66

Would other laboratory screening methods be more appropriate than a malaria thick+thin smear in asymptomatic, likely low-risk patients?

(Pritt), 01/14:66

Can CoQ₁₀ supplements affect the level of Coumadin (that is, the INR)? (Drouin, Higgins), 01/14:66

Is participation in proficiency testing required for all sites that do HER2 testing? (Palicki), 02/14:93

Why not screen all HIV-negative samples using nucleic acid amplification testing? (Branson), 02/14:93

With automated CSF/body fluid cell counting becoming more the norm, is it acceptable to report the automated RBC count with a qualifying comment from the cytospin of "RBC ghosts present"? (George), 02/14:93

What are the actionable mutations in melanoma that warrant routine molecular testing? (Grossmann AH, Grossmann KF), 03/14:77

Are there generally accepted guidelines for routine molecular testing of high-grade gliomas/glioblastomas (GBM)? (Burton), 03/14:78

Please provide guidance on medically necessary tests as defined in CMS regulations published in chapter 15 of the Medicare Benefit Policy Manual (Wood), 03/14:80

How quickly are molecular diagnostic tools replacing DFA? (Procop), 04/14:78

Does the word guideline mean the same as procedure? Could guidelines also mean references? (Mateski), 04/14:78

On urine cytologies, are there numbers on how often the findings of suspicious for malignancy for groups of atypical cells for a neoplasm believed to be urothelial are found to be from another source? (Crothers), 04/14:78

Is it permissible to report reference ranges for both absolute and percent cell counts? (Etzell), 05/14:72

What is the acceptable practice for discarding excess urine from urine samples? (Lum), 05/14:72

Are there current studies regarding uric acid test analysis on patients receiving rasburicase? (Lum), 06/14:84

Is it acceptable to run the blue-top tube to see if there are platelet clumps and, if not, just report the EDTA answer for the platelets? (Etzell, Perkins), 06/14:84

What are the best markers to identify metastatic melanoma? (Kandalajt), 07/14:86

Is there a clinically significant reason to continue performing CK-MB assays and, if so, are there standardized criteria for when to report an index rather than the mass units? (Kahn), 07/14:87

Is there a trough and crest occurrence with blood testosterone levels? (Faix), 08/14:92

What is the relationship between the presence of moderate to many spherocytes and the MCHC parameter? (Zwick), 08/14:92

What is the reason for the difference in Hgb levels when drawing for a CBC in the early morning versus afternoon for the same patient? (George), 09/14:104

How does the CAP view using the transference process as described in CLSI document C28-A3C, Defining, Establishing, and Verifying Reference Intervals in the Clinical Laboratory; Approved Guideline? (Horowitz), 09/14:105

Is it common practice to report the color of a body fluid after it's spun down? (Girgis), 10/14:103

What is the validity of salivary cortisol test results? (Vesper), 10/14:103

What CBC parameters should be corrected when performing a platelet count from a blood sample collected in a sodium citrate tube? (Bradley), 11/14:86

What are the regulations for corrective action for nucleated red blood cells? (Zwick), 11/14:86

Legal ramifications for med techs or technicians if they release results on suboptimal specimens on the insistence of physicians (Perry, Williams), 12/14:69

Consensus recommendations for the diagnosis of eosinophilic esophagitis, eosinophilic gastroenteritis, and eosinophilic colitis (Ramirez), 12/14:69

Quality assurance/quality control/quality improvement

Risk management steps up labs' QC game under IQCP, 09/14:01

In lab QC, how much room for improvement?, 10/14:01

Q-Probes

Is molecular AP testing in sync with guidelines?, 11/14:01

Reagents

Handling a reagent recall, step by strenuous step, 02/14:24

Reference lab testing services/send-out testing

Slashing send-out costs with lab formularies, 07/14:01

Screening tests

Study: primary HPV test 'merits consideration', 09/14:01

A laboratory on the trail of troubling TSH results, 09/14:05

Sexually-transmitted diseases/infections

The perils of overlooking lesser-known STIs, 01/14:01

Test formularies

Slashing send-out costs with lab formularies, 07/14:01

Test utilization (see also Screening tests)

Taking aim at overuse: daily labs, high-cost send-outs, 04/14:64

Thyroid disease/testing

A laboratory on the trail of troubling TSH results, 09/14:05

TRALI

AABB ramps up donor screening to help stem TRALI, 10/14:01

Transfusions (see Blood banking/transfusion)

Unnecessary testing

Clinician-friendly tactics slash unwarranted testing, 01/14:56

Urinalysis/urinary tract infections

In urinalysis, automated microscopy making the difference, 03/14:61

Vancomycin

Study: elevated vancomycin MICs no cause for concern, 12/14:05

Viruses/viral outbreaks/virology

Unwinding the mystery of Heartland virus disease, 07/14:05

Labs ramp up for Ebola patients, specimens, 12/14:01

Amid Ebola preparation, an EV-D68 outbreak, 12/14:53

Warfarin

Can an old drug be taught new pharmacogenetic tricks?, 04/14:01
