

## 2015 CAP TODAY Article Index – (Final for 2015)

**Note: This index does not cover the CAP TODAY “Marketplace” or “Abstracts” columns.**

### **AACC meetings**

Diagnostic perils of hematologic illness, 02/15:01

At the AACC show, 09/15:86

Leveraging urinalysis for value-based health care, 11/15:05

For heart failure markers, what looks hopeful? 11/15:01

### **AMP molecular case reports**

Colorectal carcinoma with germline *MLH1* promoter hypermethylation, 04/15:18

Coexisting germline mutations in *APC* and *BRCA2* in a patient with colon cancer, 06/15:62

Value of targeted NGS in a diagnostically challenging case of CMML, 11/15:16

Multiplex PCR test for detection of enteropathogens in an infant, 12/15:44

### **Analytics**

Analyze this: data shines within and without, 11/15:01

### **Anemia**

Lab studies new steps in urine and anemia screening, 08/15:78

### **Automation**

The inside track in AP automation: new product guide, 02/15:16

Labs solve price, space squeeze to welcome TLA, 05/15:18

Laboratory automation: more than moving from here to there, 08/15:22

### **Autoverification**

A step-by-step process to 95% autoverification, 12/15:29

## **Billing/revenue cycle management**

Labs entering risky payment game in the new year, 01/15:03

## **Biomarkers**

Molecular markers to lessen the uncertainty, 04/15:46

AKI risk biomarkers may be 'as early as it gets', 06/15:12

For CKD, work is on to refine and find biomarkers, 07/15:05

Twists and turns in biomarker exploration, 08/15:01

For proven natriuretic peptides, still much to be learned, 11/15:66

For heart failure markers, what looks hopeful? 11/15:01

## **Blood/coagulation/hematology**

Coag quest: keying into the clot risk of cancer patients, 01/15:01

Diagnostic perils of hematologic illness, 02/15:01

Study, strategy lift up POC critical value practices, 02/15:50

Pressing questions in POC glucose testing, 04/15:01

Nothing peripheral about assessing the 'other' cytopenias, 04/15:56

Groups urge phase-in of *RHD* genotyping, 10/15:01

## **Blood banking/transfusion**

Trials show no benefit from fresher red cells, 09/15:01

Next step in blood use program: end-of-life transfusion, 10/15:74

Mislabeling, wrong-blood-in-tube errors rare but there, 11/15:62

## **Breast cancer/breast health**

Laying worries to rest over breast biopsy discord, 05/15:01

Twists and turns in biomarker exploration, 08/15:01

With DCIS, where does the real risk lie? 12/15:01

## **Business analytics**

Business analytics insight within easy reach, 07/15:01

## **Cancer (see also Leukemia and Breast cancer/breast health)**

In a flourish of subtypes, genes, and drivers, 01/15:01

Coag quest: keying into the clot risk of cancer patients, 01/15:01

Genetic profiling vies with IHC in retune of CUP testing, 03/15:01

Keeping an active eye on prostate cancer, 04/15:01  
Colorectal carcinoma with germline *MLH1* promoter hypermethylation, 04/15:18  
Molecular markers to lessen the uncertainty, 04/15:46  
New guideline spells out IPMN essentials, 06/15:01  
Prostate biopsy's role in active surveillance, 12/15:01

### **CAP '15 meeting**

At CAP '15, 98 Courses and a focus on daily practice, 05/15:05  
28 given awards for notable and longtime service, 11/15:79  
Prostate biopsy's role in active surveillance, 12/15:01  
PIN, interobserver variability, computer-aided image analysis, cost, 12/15:42

### **CAP lab accreditation/checklists/protocols**

QC for accreditation: CMS validation inspections, 05/15:01  
Carbapenem resistance: advice from the frontline, 08/15:01  
In vitro microscopy checklist ready when labs are, 09/15:46

### **CAP Press**

Transplant pathology atlas practical and to the point, 01/15:17  
Liver donor organ evaluation, 02/15:48

### **CAP programs/products/services (see also Q-Probes and Proficiency testing)**

How satisfied are physicians with labs? Study digs deep, 03/15:05  
Pap test litigation: Not backing off: CAP retains call for blinded review, 03/15:50  
Upper-echelon QA through Accuracy-Based Programs, 06/15:01  
Visuals to the fore in new histology labeling guideline, 06/15:48  
Evidence drives guideline on reducing interpretive error, 07/15:60  
What's new in next-gen sequencing checklist requirements, 08/15:62  
Delta checks as safety net: how used, how useful?, 09/15:22  
3 new NGS Surveys on CAP 2016 PT launchpad, 11/15:01

## **CAP TODAY webinars**

Flexible ordering may unravel pay snags for respiratory panels, 10/15:01

## **Carbapenem resistance**

Carbapenem resistance: advice from the frontline, 08/15:01

## **Cardiovascular disease/cardiac markers**

For heart failure markers, what looks hopeful? 11/15:01

## **Centers for Medicare & Medicaid Services**

IQCP worries? Help with what ends and begins, 07/15:01

## **CLIA**

Full-court collaboration in transition to IQCP, 09/15:01

## **Co-mingling of radiology and pathology (see also Radiology)**

Integrating AP and radiology, inch by inch, 09/15:01

## **Companion diagnostics**

Pharma strives to aid companion diagnostics, 05/15:43

## **Cytopathology and More**

Automated screening workload limits are too high, 01/15:45

FNA specimens for HPV molecular testing in head and neck SCC,  
01/15:45

For cytopathologists, MOC exam pass rates and options in 2014, 01/15:46

Touch Imprint/Crush Prep Program better by another name? 01/15:48

Negative Pap, positive hrHPV: what we know so far, 05/15:48

Latest guidelines for pancreatobiliary cytology – a recap, 05/15:48

Inside the 2014 Bethesda System for Reporting Cervical Cytology,  
05/15:54

Aptima HPV and Aptima genotype assays for triage of borderline  
squamous (ASCUS) cytology: CLEAR study, 05/15:56

ICD-10: finishing touches or finding the road?, 08/15:52

Primary HPV screening, Pap-HPV cotesting: interim guidance and a  
retrospective study, 08/15:52

Telecytopathology's potential starting to be seen, 08/15:55

### **Dark Report**

Labs entering risky payment game in the new year, 01/15:03

### **Data integration/data management**

Analyze this: data shines within and without, 11/15:01

### **Delta checks**

Delta checks as safety net: how used, how useful?, 09/15:22

### **Diabetes**

Latest HbA<sub>1c</sub> debate examines race as nonglycemic factor, 12/15:01

### **Drug treatments/dosing**

At St. Jude, preemptive PGx tests guide prescribing, 04/15:05

### **Electronic health records/electronic medical record systems**

LIS to EHR: Is results transmission what it should be?, 01/15:42

### **Electronic order entry**

How satisfied are physicians with labs? Study digs deep, 03/15:05

### **Executive War College**

RFID keeps lab's supplies on hand, just in time, 06/15:05

### **From the President's Desk**

Making disaster readiness routine, 01/15:09

A need for clarity on regulation of LDTs, 02/15:11

Transitions in training and practice, 03/15:11

Together, we gain more than we give, 04/15:09

CAP Learning: practical and progressive, 05/15:11

Lab leadership in public health, 06/15:11

Our role in shared decision-making, 07/15:15

Showing what is in our hearts, 08/15:11

Partnerships for patients, 09/15:11

First things first, 10/15:11

Travel that's worth the trouble, 11/15:11

Talk Therapy for scotoma, 12/15:11

### **Genetics/genetic testing (see also Next-generation sequencing)**

Medical genetics labs shine in 10-year proficiency test data, 01/15:01

Genetic profiling vies with IHC in retune of CUP testing, 03/15:01

In genetics, stay open to the unexpected, 07/15:01

### **Genotyping**

Groups urge phase-in of *RHD* genotyping, 10/15:01

### **Glucose/insulin/blood sugars**

Study, strategy lift up POC critical value practices, 02/15:50

Pressing questions in POC glucose testing, 04/15:01

Latest HbA<sub>1c</sub> debate examines race as nonglycemic factor, 12/15:01

### **Histology**

Visuals to the fore in new histology labeling guideline, 06/15:48

### **Hospital-acquired infections**

Carbapenem resistance: advice from the frontline, 08/15:01

Superbugs on scopes: how UCLA lab found the outbreak, 08/15:74

### **Human papillomavirus**

Primary HPV screening, Pap-HPV cotesting: interim guidance and a retrospective study, 08/15:52

For now, first still last in primary HPV testing, 10/15:01

### **ICD-10**

ICD-10: finishing touches or finding the road?, 08/15:52

### **Infection control**

Critical stressors in the microbiology lab: four Cs, 04/15:01

Carbapenem resistance: advice from the frontline, 08/15:01

Superbugs on scopes: how UCLA lab found the outbreak, 08/15:74

## **Infectious disease**

Unusual transplant-linked viral infections: 'always be aware', 09/15:70

## **Informatics/information technology (see also Automation; Digital pathology; Lab information systems, software technologies)**

LIS to EHR: Is results transmission what it should be?, 01/15:42

Interface validation: abort, retry, succeed, 02/15:01

Business analytics insight within easy reach, 07/15:01

Billing/accounts receivable/RCM systems, 09/15:25

Blood bank information systems, 10/15:69

Laboratory information systems, 11/15:37

A step-by-step process to 95% autoverification, 12/15:29

## **Instrumentation/instrument product guides**

Recently released and soon to be seen, 01/15:23

Coagulation Analyzers, 01/15:24

Bedside glucose testing systems, 02/15:56

Paths to validating, using urine sediment analyzers, 03/15:56

Pressing questions in POC glucose testing, 04/15:01

Coagulation analyzers—point of care, self-monitoring, 04/15:47

In vitro blood gas analyzers, 05/15:24

Chemistry analyzers for mid- and high-volume labs, 06/15:18

Automated immunoassay analyzers, 07/15:26

Laboratory automation: more than moving from here to there, 08/15:22

Laboratory Automation Systems and Workcells, 08/15:25

Chemistry analyzers for low-volume laboratories, 09/15:48

Menu, methods, and more for 29 analyzers, 09/15:48

Chemistry analyzers for low-volume laboratories, 09/15:48

Automated molecular platforms—the latest on two dozen, 10/15:30

Automated molecular platforms, 10/15:31

Leveraging urinalysis for value-based health care, 11/15:05

Next-generation sequencing instruments, 11/15:74

Guide to urinalysis instrumentation, 12/15:16

Urinalysis instrumentation, 12/15:17

A step-by-step process to 95% autoverification, 12/15:29

Hematology analyzers, 12/15:48

**In vivo microscopy**

In vitro microscopy checklist ready when labs are, 09/15:46

**IPMN (intraductal papillary mucinous neoplasm)**

New guideline spells out IPMN essentials, 06/15:01

**Kidney disease/kidney injury (see also Estimated glomerular filtration rate)**

AKI risk biomarkers may be 'as early as it gets', 06/15:12

For CKD, work is on to refine and find biomarkers, 07/15:05

**Lab accreditation (see also CAP lab accreditation/checklists/protocols)**

QC for accreditation: CMS validation inspections, 05/15:01

**Lab Accreditation News: Queries and Comments**

QC for accreditation: CMS validation inspections, 05/15:01

**Lab information systems, software technologies (see also Automation)**

The inside track in AP automation: new product guide, 02/15:16

AP automation systems, 02/15:19

How satisfied are physicians with labs? Study digs deep, 03/15:05

Companies say their AP LIS is up to the job, and how, 03/15:22

Anatomic pathology computer systems, 03/15:27

Hear me now? Another audition for speech recognition, 03/15:74

Laboratory-provider links software, 04/15:23

Workflow, regulatory unknowns tax molecular IT, 04/15:52

**Laboratory administration/management**

Case closed: discrepant results at multiple sites, 10/15:76

**Laboratory consolidation/meyers (see Joint ventures)**

Case closed: discrepant results at multiple sites, 10/15:76

## **Laboratory errors**

Trials for errors: how one lab fixed reporting flaws, 02/15:68

Evidence drives guideline on reducing interpretive error, 07/15:60

IOM report on diagnostic errors expected this fall, 08/15:80

Mislabeled, wrong-blood-in-tube errors rare but there, 11/15:62

## **Laboratory profiles**

New lab, new efficiencies: doors open at Geisinger, 07/15:80

## **Legal issues/actions (see also Medical mistakes, Laboratory errors)**

Pap test litigation: Not backing off: CAP retains call for blinded review, 03/15:50

## **Letters**

Great leaders in pathology, 02/15:12

Speech recognition, 05/15:06

Core laboratory QC, 05/15:08

Breast pathology study, 08/15:08

Block and slide labeling, 08/15:11

Analytics, 12/15:07

Molecular IT, 12/15:08

Volunteer pathologists needed in Kijabe, Kenya, 12/15:11

## **Leukemia**

Value of targeted NGS in a diagnostically challenging case of CMML, 11/15:16

## **Liver**

Liver donor organ evaluation, 02/15:48

## **Mass spectrometry**

From the bench, a view of MALDI-TOF mass spec, 02/15:05

MALDI in microbiology: Set to stun?, 05/15:01

## **Medicare/Medicaid (see also Physician fee schedule)**

Labs entering risky payment game in the new year, 01/15:03

2015 Medicare physician fee schedule relative value units, 01/15:16  
Pay is up in Medicare proposal, but final picture unknown, 08/15:05  
For pathologists, 8% aggregate hike in Medicare pay, 12/15:05  
2016 Medicare physician fee schedule relative value units, 12/15:06

### **Microbiology**

From the bench, a view of MALDI-TOF mass spec, 02/15:05  
Critical stressors in the microbiology lab: four Cs, 04/15:01  
MALDI in microbiology: Set to stun?, 05/15:01  
Superbugs on scopes: how UCLA lab found the outbreak, 08/15:74  
Full-court collaboration in transition to IQCP, 09/15:01

### **Middleware**

Interface validation: abort, retry, succeed, 02/15:01

### **Molecular pathology/diagnostics (see also Polymerase chain reaction technology and AMP molecular case reports)**

Medical genetics labs shine in 10-year proficiency test data, 01/15:01  
With molecular MPN testing, think positive, 03/15:01  
Colorectal carcinoma with germline *MLH1* promoter hypermethylation, 04/15:18  
Workflow, regulatory unknowns tax molecular IT, 04/15:52  
Coexisting germline mutations in *APC* and *BRCA2* in a patient with colon cancer, 06/15:62  
In genetics, stay open to the unexpected, 07/15:01

### **Natriuretic peptides**

For proven natriuretic peptides, still much to be learned, 11/15:66

### **Newsbytes**

Desire to stem lab test overuse leads to free software, 01/15:53  
Partnership develops joint reporting system for pathology and radiology, 01/15:54  
CLSI offering updated standard on information technology security, 01/15:54  
McKesson launches venture capital fund, 01/15:54

GE Healthcare to resell Caradigm connectivity software, 01/15:54  
New website to help physician office lab professionals, 01/15:54  
NovoPath integrates Leica specimen-tracking system, 01/15:54  
Simplifying the search for units of uncommon blood, 02/15:73  
HL7 introduces program to boost EHR interoperability, 02/15:73  
Alere marketing new system to POLs and medical practices, 02/15:73  
Cerner forges agreement for population health data tools, 02/15:73  
MDN extends license to insulin-management solution, 02/15:73  
CMS to alter reporting period for meaningful use, 03/15:82  
Sunquest's parent company buys Data Innovations, 03/15:82  
BBCS blood bank application incorporates labeling feature, 03/15:82  
ONC offers \$28 million in HIE program grants, 03/15:82  
Psyche system meets EHR certification criteria, 03/15:83  
Royal Philips adds image analysis to digital solution, 03/15:83  
Cerner contributes to UAE health care portal, 03/15:83  
How a best practice alert cut unneeded transfusion, 04/15:69  
Health care heavy hitters in Pittsburgh form alliance, 04/15:70  
Omnyx and Argent enter digital pathology agreement, 04/15:70  
New AccuCore software for audits and inspections, 04/15:71  
Cartagenia upgrades software for genetics labs, 04/15:71  
Biomedical Systems adds to clinical trial offerings, 04/15:71  
A lab IT strategic plan: from guidance to lessons learned, 05/15:70  
ONC report takes aim at health information blocking, 05/15:70  
Meditech supports CAP synoptic reporting product, 05/15:71  
Xifin and vRad to generate consolidated reports, 05/15:71  
Cerner partners with Tableau on interactive data analysis, 05/15:71  
Another vendor now member of CommonWell network, 05/15:71  
Consortium gaining ground in quest for interoperability, 06/15:81  
Xifin purchases VisualShare, 06/15:82  
CDC releases update on electronic lab result reporting to public health agencies, 06/15:82  
Enzo Life Sciences releases ELISA plate reader app, 06/15:82  
Orchard Software features white papers on website, 06/15:82  
Imprivata expands reach with acquisition of HT Systems, 06/15:82  
Sampleminded teams up with Exact Sciences, 06/15:82  
Why Sonora Quest gave itself high marks for LIS conversion, 07/15:105

Pathologists share homegrown software for infant autopsies, 07/15:106  
CMS promotes innovation by offering data to private sector, 07/15:107  
Agilent purchases Cartagenia, 07/15:107  
Database provides information from next-gen sequencing, 07/15:107  
How one pathologist made use of artificial intelligence, 08/15:84  
Abbott purchases Omnilab, 08/15:84  
As ICD-10 deadline looms, CMS revises and teaches, 08/15:84  
New app provides patients with laboratory test results, 08/15:84  
Proscia offering telepathology software with global focus, 08/15:85  
Thermo Fisher and CDC partner on microbial pathogen ID, 08/15:85  
Domain comparison and synchronization solution available to Cerner clients, 08/15:85  
GenoLogics releases LIMS as part of Illumina product, 08/15:85  
Cerner contracts with DoD, 08/15:85  
How site visits led to an LIS selection at Stanford, 09/15:90  
GenoSpace making headway in genomics marketplace, 09/15:90  
Xifin enters partnership with Translational Software, 09/15:90  
Illumina to buy GenoLogics, 09/15:91  
AP-Visions debuts middleware, 09/15:91  
Haemonetics launches connectivity software, 09/15:91  
RMT offering remote-control functionality for microscopes, 09/15:91  
A decade later, online laboratory handbook gets makeover, 10/15:85  
ONC offers tool to address health IT product complaints, 10/15:86  
CMS sets up center to tackle ICD-10 issues, 10/15:87  
Bio-Rad Laboratories releases risk-management software, 10/15:87  
Foundation Medicine unveils genomics software, 10/15:87  
Glencoe Software introduces digital pathology product, 10/15:87  
Collaborative prepares pilot on managing genomic data in EHRs, 11/15:85  
ONC finalizes nationwide interoperability roadmap, 11/15:86  
NovoPath introduces clinical results management module, 11/15:86  
AHIMA offering service for coding questions, 11/15:86  
Sunquest releases new version of genetics software, 11/15:86  
UniConnect adds modules to molecular lab system, 11/15:86  
Inspirata partners with EMC to enhance digital path solution, 11/15:86  
Fellowship blends clinical informatics and pathology, 12/15:70

University research team develops virtual human, 12/15:70  
Sunquest parent company to buy Atlas Medical, CliniSys, 12/15:71  
Illumina to release two cloud-based genomics systems, 12/15:71  
Visiun launches module for blood use analysis, 12/15:71  
Free urinalysis mobile app, 12/15:71

### **Next-generation sequencing/Sanger sequencing**

Groups closing the gap in reference materials for sequencing assays, 03/15:01  
For viral diagnosis, metagenomic NGS, 06/15:01  
Paths to validating next-gen sequencing assays, 07/15:94  
What's new in next-gen sequencing checklist requirements, 08/15:62  
3 new NGS Surveys on CAP 2016 PT launchpad, 11/15:01  
Next-gen sequencing settling in, making its mark, 11/15:68

### **Obituary**

In Memoriam Pathologist and graceful leader, 08/15:06

### **Pap tests (see Cytopathology/histology and Cytopathology and More)**

Pap test litigation: Not backing off: CAP retains call for blinded review, 03/15:50

### **Payment issues**

Labs entering risky payment game in the new year, 01/15:03

### **Pharmaceuticals**

Pharma strives to aid companion diagnostics, 05/15:43

### **Pharmacogenomics**

At St. Jude, preemptive PGx tests guide prescribing, 04/15:05

### **Physician fee schedule (see also Medicaid/Medicare)**

Pay is up in Medicare proposal, but final picture unknown, 08/15:05

### **Point-of-care testing/guidelines/standards**

Study, strategy lift up POC critical value practices, 02/15:50

Pressing questions in POC glucose testing, 04/15:01

**Proficiency testing (see also CAP programs/products/services)**

Upper-echelon QA through Accuracy-Based Programs, 06/15:01

PT failures: steps to preventing a cease testing, 09/15:05

NY cuts labs loose from requirement to use state's PT, 10/15:05

Make no mistake—PT referral not allowed, 10/15:50

3 new NGS Surveys on CAP 2016 PT launchpad, 11/15:01

**Prostate**

Keeping an active eye on prostate cancer, 04/15:01

Prostate biopsy's role in active surveillance, 12/15:01

**Put it on the Board**

Digitized slides spur patient engagement, 'allow for democratized medicine', 01/15:62

POC syphilis test earns CLIA waiver, 01/15:62

Acute kidney injury risk test available, 01/15:61

Focus' flu and RSV Direct kit cleared for more influenza strains, 01/15:61

Roche acquires Bina, enters genomic informatics market, 01/15:61

FDA grants first CLIA waiver for nucleic acid-based flu diagnostic test, 01/15:61

Myriad BRACAnalysis CDx approved as companion for olaparib, 01/15:61

'Quality monitors, test validation made ever more critical' in cervical cancer screening, 02/15:82

AMP outlines laboratory view on incidental findings, 03/15:90

FDA sheds light on digital pathology standards, 03/15:90

New guidelines for determining disease-causing potential of genetic variants, 03/15:89

Door opens on direct access to genetic tests, 04/15:78

BRCA mutation type affects cancer risks, 04/15:78

Bruker's MALDI lands additional FDA clearance, 04/15:78

Quest, Quintiles join to offer clinical trial lab services, 04/15:77

In rare instances, NIPT finds mother's cancer, 05/15:78

BioFire submits de novo application for fourth panel, 05/15:78

How patients want to get their skin biopsy results, 05/15:78  
FDA clears automated digital IFA microscope, 05/15:88  
Molecular group A strep direct test OK'd, 05/15:77  
i-Stat Total  $\beta$ -hCG test cleared, 05/15:77  
Keep close eye on payments to physicians, 06/15:90  
NIST releases first 'genome in a bottle', 06/15:89  
For blood supply safety, time for technology mandate, 06/15:89  
CE for NSCLC liquid biopsy, 06/15:89  
FDA clears two Roche tests, 06/15:89  
Siemens launches handheld coagulation analyzer, 06/15:89  
AMP puts a cost—and value—to sequencing procedures, 07/15:114  
Liquid biopsy seen as one disruptive technology, 07/15:113  
OPKO to buy Bio-Reference, 07/15:113  
Ventana gets OK for crizotinib IHC companion Dx, 07/15:113  
To meet TAT goals, Vanderbilt builds ED lab, 08/15:90  
Sunquest, TriCore partner, 08/15:90  
FDA clears and waives Theranos' HSV-1 test, system, 08/15:90  
Bio-Rad introduces fifth-generation HIV test, 08/15:90  
Qiagen's EGFR kit approved for use with Iressa, 08/15:90  
Orchard Software launches analytics unit, 08/15:90  
Roche buys 'sample in, susceptibility out' technology, 09/15:98  
Cerner partnership lands DOD EHR deal, 09/15:98  
More than half of pathology trainees in 2012 were women, 09/15:97  
Front-end automation for multiplex genetic analysis, 09/15:97  
Noridian OKs Prolaris for Medicare coverage, 09/15:97  
Neuropathologist Dr. Omalu in spotlight at CAP '15, 10/15:94  
Revised HER2 guidance shifts findings in practice, 10/15:93  
Roche's flu A/B test waived, 10/15:93  
Trial finds risk-stratification value in Oncotype DX, 10/15:93  
California registry pools pathology cancer data, 10/15:93  
Precision medicine project to enroll 1 million, 10/15:93  
Approvals mark 'tip of the iceberg' for PD-L1 testing, 11/15:94  
BioFire's meningitis/encephalitis panel cleared, 11/15:93  
*C. diff.* molecular testing linked to overtreatment, 11/15:93  
23andMe offers new version of genome service, 11/15:93  
FDA clears Cepheid's trichomoniasis test, 11/15:93

Qiagen touts one-stop shop for next-gen sequencing, 12/15:78

Surgical museum highlights pathologist's role, 12/15:77

Roche *EGFR* test approved as Tagrisso companion, 12/15:77

Sectra offers pathology-radiology solution, 12/15:77

CE mark for Biocartis' respiratory panel, 12/15:77

## **Q&A**

Establishing and verifying PT and APTT reference intervals (Higgins, Olson), 01/15:55

Using ALK immunohistochemistry in lung adenocarcinoma to select patients for targeted therapy (Jensen), 02/15:74

Why does cryoprecipitated antihemophilic factor from blood groups A and B have higher levels of factor VIII than cryoprecipitated AHF from blood group O? (Winters, Lockhart, Zantek), 2/15:74

Can RBC parameters rule out beta thalassemia trait? And can the sickle solubility test rule out sickle cell disorder? (Piscitelli, Oliveira), 03/15:83

Significance of the absence of coagulation of seminal fluid in a patient who previously experienced normal seminal fluid coagulation followed by normal liquefaction, and had fathered children (Johnson), 03/15:84

Why is the number 12 for lymph node retrieval in colon cancer protocol reporting not specific to the kind of resected specimens and whether a total colectomy was performed? (Kakar), 04/15:72

Are there any references that would list absurd or invalid values for clinical chemistry analytes? (Alter), 04/15:72

Necessity of additional testing before organ harvesting (Branton), 05/15:72

Can IgA-deficient patients who require transfusion receive blood only from donors who are also IgA deficient? (Sandler, Eder, Goldman, Winters), 06/15:83

Is the lactate test more accurate on a blood gas analyzer using ion-selective electrode or on a general chemistry analyzer using oxidation-reduction reaction? (Carlow, McCash), 06/15:83

Ergonomic problems with a reorganized blood bank workflow, (Woolley), 07/15:104

What is an acceptable month-to-month variation or lot-to-lot variation in mean values in various clinical chemistry tests? (Horowitz), 07/15:105

Significant difference in results for urine total protein between two instruments: How to explain the difference to clinicians (Eckfeldt, Ingall), 08/15:86

What is the composition of 3-factor PCC, 4-factor PCC, and FEIBA, and how are they prepared commercially? (Tormey), 09/15:89

What is the current state of serum testosterone testing in the adult male population? (Horowitz, Wagar), 09/15:89

Should such immature cells as myelocytes, promyelocytes, and metamyelocytes be included in absolute neutrophil count? (Clement, Patel), 10/15:84

Are pediatric reference ranges for chemistry panels from tibial marrow the same as for peripheral blood? (Alter, Cervinski), 10/15:84

How can pathologists' varied experience with the same speech-recognition product be explained? (Weinstein), 10/15:85

Recommendations for checking APTT reagent sensitivities (for the identification of factors VIII and IX) when changing lot numbers and reference range (Goodwin, Higgins), 11/15:85

How is haloperidol usually administered in a hospital? (Jones), 12/15:69

Is there any protocol for reference ranges for transgender populations? (Wu) 12/15:69

Process of validating new hematology equipment (Martire), 12/15:69

### **Q-Probes**

LIS to EHR: Is results transmission what it should be?, 01/15:42

How satisfied are physicians with labs? Study digs deep, 03/15:05

Delta checks as safety net: how used, how useful?, 09/15:22

Mislabeled, wrong-blood-in-tube errors rare but there, 11/15:62

### **Quality assurance/quality control/quality improvement**

Makeovers smarten core labs' quality control, 02/15:01

QC for accreditation: CMS validation inspections, 05/15:01

IQCP worries? Help with what ends and begins, 07/15:01

Paths to validating next-gen sequencing assays, 07/15:94

### **Quality control**

Paths to validating next-gen sequencing assays, 07/15:94

Full-court collaboration in transition to IQCP, 09/15:01

### **Radio frequency identification**

RFID keeps lab's supplies on hand, just in time, 06/15:05

### **Reflex testing algorithms**

Lab studies new steps in urine and anemia screening, 08/15:78

### **Respiratory viruses/treatments**

Flexible ordering may unravel pay snags for respiratory panels, 10/15:01

### **Screening tests**

For now, first still last in primary HPV testing, 10/15:01

Flexible ordering may unravel pay snags for respiratory panels, 10/15:01

### **Secondary reviews**

Evidence drives guideline on reducing interpretive error, 07/15:60

### **Shorts on Standards**

Anatomic pathology 'practitioner'? Emerging roles for the cytotechnologist, 01/15:44

Practice parameters for perioperative blood management, 12/15:43

### **Speech recognition/transcription**

Hear me now? Another audition for speech recognition, 03/15:74

### **Telepathology**

Telecytopathology's potential starting to be seen, 08/14:55

### **Test development/management**

At St. Jude, preemptive PGx tests guide prescribing, 04/15:05

### **Thyroid disease/testing**

In a flourish of subtypes, genes, and drivers, 01/15:01

## **Transplantation/transplant services**

Transplant pathology atlas practical and to the point, 01/15:17

## **Urinalysis/Urinary tract infections**

Paths to validating, using urine sediment analyzers, 03/15:56

AKI risk biomarkers may be 'as early as it gets', 06/15:12

For CKD, work is on to refine and find biomarkers, 07/15:05

Lab studies new steps in urine and anemia screening, 08/15:78

Leveraging urinalysis for value-based health care, 11/15:05

## **Venous thromboembolism**

Coag quest: keying into the clot risk of cancer patients, 01/15:01

## **Viruses/viral outbreaks/virology**

For viral diagnosis, metagenomic NGS, 06/15:01

Unusual transplant-linked viral infections: 'always be aware', 09/15:70
