

2006 CAP TODAY Article Index

Note: This index does not cover the CAP TODAY “Marketplace” or “Abstracts” columns.

AACC meetings

From errors to computing and staffing, AACC show had it all, 10/06:72

AIDS/HIV/other bloodborne diseases

Picking the right site for HIV testing, 11/06:1

Analyzer surveys (see Instrumentation/instrument surveys)

Automation

Automation to suit labs of all sizes, 3/06:58

In histology, Lean teams up with automation, 8/06:1

For mid-size labs, automated mix a good match, 8/06:66

How Pap test automation is playing out, 10/06:1

Blood centers set sights on full automation, 10/06:1

Billing

Guarding against private health plan abuses, 8/06:12

Blood/coagulation/hematology

Q&A: One pathologist reviews more than 70 percent of the hematology slides and makes a report—is this practice common and acceptable? 1/06:85

Q&A: Are finger-sticks or capillary blood-draw tubes appropriate for all chemistries or for general chemistry, therapeutic drug monitoring, or oncology? 2/06:90

Q&A: Have studies been done correlating the use of caloric supplements with patients who are on Coumadin? 4/06:75

Q&A: Can consuming a large quantity of soy prolong prothrombin time? 8/06:91

Blood banking/transfusion

Q&A: What is the best way to ensure that patients receive the specialized blood components they need? 2/06:90

Q&A: What marker should laboratorians review in the absence of the crossmatch-to-transfusion ratio? 3/06:14

Blood centers set sights on full automation, 10/06:1

B-type natriuretic peptide

One-two punch in evaluating PE risk, 11/06:1

Cancer

Lung cancer breakthrough: EGFR assay, 1/06:1

Circulating tumor cell test shows clinical mettle, 5/06:1

Going head-to-head to boost lymph node numbers, 6/06:1

For tumor markers, hope springs eternal, 7/06:1

Are ASC-US rates reasonable? HPV test could answer that question, 7/06:80

BRCA: What we know now, 9/06:1

What microarrays say about lymphomas, 10/06:1

Q&A: How do you use CD20, CD79a, and PAX-5 for B-cell determination? 10/06:94

Q&A: How do you use CD20, CD79a, and PAX-5 for B-cell determination, and are there situations where one is especially useful, as in Hodgkin versus T-cell-rich B-cell lymphoma? 10/06:94

Raising the bar for HER2 results, 12/06:1

Logic takes a holiday in dual approval of EGFR test, Erbitux, 12/06:1

CAP '06

What's the use? CAP '06 tackles the practical, 6/06:76

New officer, governors sworn in, 10/06:84

CAP news

CLA revamp means speed, efficiency, 4/06:51

CAP programs/services (see also Q-Probes)

Six CAP groups pitch into tough pathology issues, 4/06:5

Guarding against private health plan abuses, 8/06:12

Cloudy or clear? Best forecasts for urine cultures, 11/06:86

Same book, different page—handling critical values, 12/06:5

CAP publications

In living color: new body fluids atlas, 10/06:52

Capitol Scan

CAP asks for withdrawal of proposed units-of-service limits, 1/06:86

Improving public access to patented technologies, 1/06:86

New clinical lab codes—'06 payment levels in line with CAP advice, 1/06:86

Report out on waived testing 'best practices', 1/06:86

Weighing in on waived test guidance, 1/06:87

Mobilizing against MUEs, 3/06:105

'92 reg overstates benefits of cytology proficiency testing, 4/06:78

CMS to make another stab at MUEs, 5/06:97

Estimated cut for '07: 4.6%, 5/06:97

Cost-saving ideas released, 5/06:97

New 'Unbelievable Edits' list to be released in August, 6/06:96

Arizona No. 10 for direct billing legislation, 6/06:96

Sizing up views of licensure laws, 6/06:96

Medical liability bills fail in Senate, 6/06:97

CAP's legislative, regulatory focus for '06, 6/06:97

AMA adopts EGFR resolution, 7/06:128

CAP hosts state pathology leaders, 7/06:128

Clinical lab oversight, 7/06:128

Pathology excluded from January MUE implementation, 8/06:90

A permanent TC grandfather, 8/06:90

CLIAAC's cytology PT recommendations, 8/06:90
A direct billing law in Tennessee, 8/06:90
2007 proposed physician fee schedule, 9/06:106
Direct billing in Massachusetts, 9/06:108
New hope for a cytology PT alternative, 10/06:98
A possible permanent TC grandfather, 10/06:99
Call on congress to mend flawed SGR, 11/06:120
Asking NY officials to fix licensure regs, 11/06:120
What OIG will zero in on in '07, 11/06:120
Pathology faces 11 percent cut in 2007, 12/06:74
Senator introduces bill to modify cytology PT, 12/06:74
MUEs now more manageable, 12/06:75
AMA, CAP to survey physician practices, 12/06:75

Cardiovascular disease/cardiac markers

Looking high and low for cardiac markers, 4/06:1
hsCRP guidance no term of endearment, 8/06:1

Careers/employment

Minding the business end of pathology, 8/06:1

Clostridium difficile

C. difficile back with a vengeance, 5/06:1

Company consolidation (see Joint ventures/company consolidation)

Company profiles/news

Testing 1,2,3, 1/06:58
Why and how Hurley Medical Center chose co-ownership, 3/06:46
Off the flow charts: What users say about BD's latest, 11/06:101

Competency assessment

Recertification a good bet for all, 8/06:42

Competitive bidding

Approaching zero hour for competitive lab bidding, 1/06:5

Core laboratories

Lessons from three core curriculums, 7/06:1

CPT questions/coding

Is CPT code 88360 appropriate for billing estrogen receptors by manual quantitative immunohistochemical analysis if the results are reported as 87 percent tumor cells staining? 1/06:86

Should I bill using CPT codes 88329 and 88333 if an intraoperative consultation with microscopic review of touch preparation is performed without a frozen section? 1/06:86

CMS and CERT contractor handling undercoded services, 5/06:97

Billing for frozen sections and squash preps, 5/06:97

For endocervical brushing specimens on a ThinPrep slide, can we process these as a nongynecologic specimen even though it is a cytology of a gynecological site? 7/06:128

Can our lab pass consultation charges to the patient or the patient's insurance? 7/06:128

What is the proper code for a gallbladder submitted with a lymph node? 9/06:108

How do you code two specimens (right tube/ovary and left tube/ovary) from a positive test for the tumor-suppressor gene BRCA2? 9/06:108

Billing for outside consult services, 10/06:11

Should we use CPT code 88302 or 88304 for a foreskin removed for phimosis or hypospadias from an infant that is more than 30 days old? 11/06:121

What is the correct charge for a Cesarean-section scar excised from the wall of the abdomen? 11/06:121

C-reactive protein

hsCRP guidance no term of endearment, 8/06:1

Critical values

Critical thinking on critical values, 9/06:1

Cytopathology/histology (see also PAP/NGC Programs Review)

2005 regulatory PT results: What do they really mean? 5/06:48

Back to the beginning of the CET Consortium, 5/06:51

Are ASC-US rates reasonable? HPV test could answer that question, 7/06:80

In histology, Lean teams up with automation, 8/06:1

How Pap test automation is playing out, 10/06:1

Real simple—ASCCP guidelines set things straight, 11/06:5

Sticky business—using kits contrary to labeling, 11/06:64

D-dimer

One-two punch in evaluating PE risk, 11/06:1

Diagnostic test kit

Sticky business—using kits contrary to labeling, 11/06:64

Digital imaging

Breaking the glass slide habit to make primary diagnoses, 4/06:1

Editorials of CAP president (see President's Desk)

EGFR (HER1) test

Logic takes a holiday in dual approval of EGFR test, Erbitux, 12/06:1

Electronic health/medical records

OK to donate select electronic record technology, 10/06:48

Firsthand Views

The future of pay and peanut butter, 1/06:98

Merging Lean and 'go home happy', 2/06:102

Meeting and mental energy, 3/06:118
Your best-ever colleagues, 4/06:90
The power of listening, 5/06:110
Charting performance like a stock, 6/06:110
The Bad-Attitude Index, 7/06:138
The morale survey, 8/06:102
The many levels of logic, 9/06:126
Inspiring experimentation, 10/06:110
The experimentist, 11/06:134
Why it pays to pay more, 12/06:90

Flow cytometry

Off the flow charts: What users say about BD's latest, 11/06:101

Gene expression test

Steering the straits of transplant testing, 6/06:1

Gene patents

Gene patents—groups aim for nonexclusive arrangements, 9/06:85

Genetics

Mutational wild cards—what do they mean? 4/06:1

Is there a place for race in medicine? 7/06:1

BRCA: What we know now, 9/06:1

Gene patents—groups aim for nonexclusive arrangements, 9/06:85

Glucose/insulin/blood sugars

Nearing high tide on low blood sugars, 3/06:1

For glucoses, tight theory a tough practice, 11/06:1

Glycemic control

Call to action on glycemic control, 3/06:90

A controlling interest in ICU blood sugars, 3/06:92

For glucoses, tight theory a tough practice, 11/06:1

HER2

Raising the bar for HER2 results, 12/06:1

Human papillomavirus

Real simple—ASCCP guidelines set things straight, 11/06:5

Hurricane Katrina

After Katrina, lessons from lab survivors, 2/06:1

Infection control

C. difficile back with a vengeance, 5/06:1

Showing MRSA no mercy, 12/06:1

Information systems, technologies (see also Automation)

Sifting through anatomic pathology system needs and wants, 1/06:18

Smooth operator in the lab: middleware, 2/06:1

Automation to suit labs of all sizes, 3/06:58

When POC connects the data, everyone wins, 4/06:20

Lab-link software vendors take stock of tomorrow, 5/06:12

The lowdown on choosing a lab-link vendor, 5/06:18

Plenty of solutions to shore up an aging LIS, 6/06:5

Middleware: A go-between gains ground in the lab, 6/06:62

Suit yourself: making patient ID technology fit, 7/06:108

Get your bearings before buying a blood bank system, 10/06:24

Hang on or move on? How to assess an LIS, 11/06:18

On a quest for a new LIS? Research, research, research, 11/06:24

Instrumentation/instrument surveys

In coagulation market, no need to break the budget, 2/06:22

Collection the key, regardless of the route, 3/06:20

All the basics on 11 bedside glucose-testing systems, 4/06:26

For home or PC use, a variety of options (coag analyzers at the point of care, self monitoring), 5/06:70

Move to integrated analyzers well underway, 6/06:14
Chemistry analyzers—all that's new and more, 7/06:14
Menu and other enhancements underway (chemistry analyzers for low-volume labs), 8/06:19
Blood gas vendors move forward on menu, convenience, stability, and more, 9/06:24
New QC, parameters, and automation for hematology analyzers, 12/06:12

Insulin (see Glucose/insulin/blood sugars)

Joint ventures/company consolidation

Why and how Hurley Medical Center chose co-ownership, 3/06:46
Adding up the lessons from consolidation, 5/06:1
Parsing Sonic's buy of U.S. laboratory, 9/06:1

Lab automation

Smooth operator in the lab: middleware, 2/06:1
Middleware: A go-between gains ground in the lab, 6/06:62
Lessons from three core curriculums, 7/06:1

Laboratory Accreditation News/CLA programs

Reinforcing the safety net, 3/06:11
Surprise! Unannounced inspections not so bad, 4/06:46
Lab inspector training online; PT performance monitoring on tap, 8/06:57
Checklists undergoing more intensive review, 8/06:64
CAP fine-tunes unannounced inspection process, 12/06:55

Laboratory Accreditation News: Queries and Comments

Why the term "commentary" in CAP checklist questions has been replaced with the word "note," 4/06:46
Maintaining competence among personnel performing point-of-care testing, 4/06:46

Verifying the accuracy of automatic pipettes, 4/06:46
Using bar-coded labels on the glass slides in the anatomic pathology department, 4/06:46
How CAP checklists address noisy instruments in the lab, 8/06:57
Guidance for inspecting for questions TLC.10500 and TLC.10600 (the lab director's role in lab management) in the new team leader checklist, 8/06:57
The necessity of validating the pneumatic tube system in a lab, 8/06:57
The necessity of revalidating rules of a lab's autoverification process, 8/06:59
The necessity of a written contract to ensure that appropriate transfusion support is occurring, 12/06:55

Lean manufacturing principles

Trimming the fat from lab processes, 5/06:42
In histology, Lean teams up with automation, 8/06:1

Legal issues (see also Medical mistakes)

Expert witness guidelines: Pathologists given new order in the courtroom, 7/96:5
Clash act: peer review of expert witness testimony, 10/06:5
Sticky business—using kits contrary to labeling, 11/06:64

Proficiency testing (see also Laboratory Accreditation News/CLA programs)

How the CAP's PT program works, 2/06:62
With PT samples, labs need to keep it to themselves, 1/06:46

Psychiatry/drug therapy

Chip shot—psychiatry puts targeted test in play, 7/06:86

Pulmonary embolism

One-two punch in evaluating PE risk, 11/06:1

Q&A

Why are there so many published equations for calculating osmolality and is one equation best? (Kazmierczak), 1/06:84
One pathologist reviews more than 70 percent of the hematology slides and makes a report—is this practice common and acceptable? (Novak) 1/06:85
Are fingersticks or capillary blood-draw tubes appropriate for all chemistries or for general chemistry, therapeutic drug monitoring, or oncology? (Lo), 2/06:90
What is the best way to ensure that patients receive the specialized blood components they need? (AuBuchon) 2/06:90

What to use for the benchmark quality assurance marker in the blood bank (AuBuchon), 3/06:105

Using the six-hour urine creatinine panel to manage acute renal failure patients (Horowitz), 3/06:104

Is it critical that sodium fluoride tubes be used to collect specimens for lactate? (Kazmierczak), 5/06:96

How to comply with lab's policy to call every critical value and when to report them to physicians (Yeransian), 5/06:96

Does Bouin fixation of biopsies cause false-negative IHC reactions with the lymphocytic markers? (Miller), 06/06:98

CAP AP checklist question ANP.22550 and cytology and histology blocks processed in formalin (Eisen and Fitzgibbons), 06/06:98

Is it possible to validate that the triglyceride/HDL ratio can be used as a surrogate marker for fasting insulin levels and is useful for monitoring the treatment of diabetics and assessing a patient's cardiac risk? (Winter), 7/06:125

What are the requirements for verifying the analytical measurement range for glucose meters on instruments? (Schultz), 8/06:91

Are there guidelines for reporting the presence of sperm in routine urinalysis specimens? Or for pediatric patients? (Savage), 8/06:91

Can consuming a large quantity of soy prolong prothrombin time? (Krishman), 8/06:91

How to inform physicians that the BNP/NT-proBNP results may not accurately reflect left ventricular stretching/dysfunction in patients with renal disease (Apple and Johnson), 9/06:105

Who should monitor the POC testing performed in an ambulance? (Rose), 9/06:105

Should a microscopic urine exam be performed on a negative dipstick? (Haber), 9/06:105

What needs to be done to satisfy CAP requirements for test validation when processing nonvalidated sample types for clinical chemistry testing? (D'Agostino), 10/06:94

How do you use CD20, CD79a, and PAX-5 for B-cell determination? (Dorfman), 10/06:94

Is it acceptable to do a batch sign-out of surgical pathology reports in an anatomic pathology system? The pathologist who hand signs the reports would like to electronically sign out batches. Does this jeopardize patient safety and raise legal issues for the hospital?

(Weiner, Gruber, Aller) 11/06:119

What are the best tests to assess the risk of developing acute renal failure from myoglobin in the kidney after rhabdomyolysis?

(Wilkinson), 11/06:119

What values for hematology should have delta checks to prevent preanalytical errors? (Kroft), 12/06:78

What career opportunities—pathology related or other—are possible for the pathologist who no longer wants to deal with the medicolegal consequences of diagnostic work? (Gaffey), 12/06:78

Q-Probes

Are ASC-US rates reasonable? HPV test could answer that question, 7/06:80

Cloudy or clear? Best forecasts for urine cultures, 11/06:86

Same book, different page—handling critical values, 12/06:5

Race/ethnicity

Is there a place for race in medicine? 7/06:1

Reference lab services

Owning, rather than buying, reference lab services, 3/06:42

Screening tests

Pediatric POC—small patients but big benefits, 2/06:78
