

2007 CAP TODAY Article Index

Note: This index does not cover the CAP TODAY "Marketplace" or "Abstracts" columns.

AACC meetings

Something for everyone at AACC show, 6/07:84
At AACC, services and products aplenty, 9/07:84

ACOG (Am. College of Obstet. & Gyn.) guidelines

With new ACOG guidelines, step wisely, 6/07:1

Allergy testing

(A) topic of concern: omitting specific IgE tests, 3/07:1

AlloMap test

Heart-to-heart discussion of test's value, use, 11/07:1

Analyzer surveys (see Instrumentation/instrument surveys)

Anatomic pathology

Like it or not, AP's future will be digitally driven, 3/07:90
In AP/radiology venture, seeing is believing, 9/07:1
With AP specimen identification, the hero is zero, 10/07:5
Two peas in a pod: digital AP, radiology, 10/07:56

Automation

The lab automation survey demystified, 3/07:22
Melding humans and hi-tech stops ID errors cold, 4/07:36
Automation nudges urinalysis into spotlight, 7/07:1
Automated histology—many labs, many tales, 10/07:1

Best practices

Best practices for labs? CDC hunts for answers, 5/07:94

Billing

Billing brief: the facts behind FNA codes 88172–88173, 7/07:14
Put your money where your money is: choosing the right billing/AR system, 7/07:16
Pricing slugfest—can labs outlast blows?, 9/07:1

Biovigilance

National biovigilance system a (net)work in progress, 10/07:12
What blood bank software can do for biovigilance monitoring, 10/07:16

Blood

Q&A: Why is graft-versus-host disease more prevalent among blood recipients from related versus unrelated donors? (AuBuchon), 8/07:110

Blood/coagulation/hematology

Advanced coag, deep in the heart of Texas, 3/07:50

Blood banking/transfusion

Q&A: When to do a full crossmatch for blood transfusion patients versus doing an immediate spin test, 1/07:84

Indian blood bankers soaking up U.S. know-how, 2/07:5

Taking a harder line on blood transfusions, 5/07:1

Catching, tracking, and tackling TRALI, 10/07:1

National biovigilance system a (net)work in progress, 10/07:12

What blood bank software can do for biovigilance monitoring, 10/07:16

The next step: bringing autoverification into the blood bank, 10/07:38

Bone marrow collection/biopsies

Watching the bone marrow story unfold, 11/07:1

Brief case

For syphilis screening, a new reflex testing algorithm, 8/07:5

B-type natriuretic peptide

BNP test utilization in the ED—it's not what you think, 5/07:108

Cancer

What lies ahead in cancer genetics, epigenetics, 1/07:1

Vaccines for preventing cervical cancer—where we are now, 1/07:48

Breast cancer dilemma: adjuvant chemo—can new assays help?, 3/07:1

In breast cancer diagnoses, don't balk at talk, 4/07:1

In colorectal cancer, a lymph node debate, 5/07:1

Lynch syndrome testing—when and how?, 12/07:1

Ask SAM: How well do you do on HER2 testing?, 12/07:5

CAP '07

Common questions, uncommon answers, 6/07:88

New CAP officers take their places, 11/07:111

Star performers celebrated at CAP '07, 11/07:111

CAP annual stated meeting minutes, 11/07:115

CAP Foundation

Technologies designing the 'futurescape' of anatomic pathology, 8/07:1

View master—an expert eyes digital pathology's future, 9/07:5

CAP programs/products/services (see also Q-Probes and test management)

Mastering MRSA and more in latest CAP survey, 11/07:5

Ask SAM: How well do you do on HER2 testing?, 12/07:5

Capitol Scan

Cytology proficiency testing rule delayed 5 months, 1/07:81
In Idaho, a new licensure policy for pathologists, 1/07:81
5 percent cut averted, 1/07:82
A resolution defining the practice of medicine, 1/07:82
College comments on MUEs, 2/07:90
TC grandfather claims processing, 2/07:90
Providers should apply for their NPI, 2/07:90
Fighting or the AFIP, 2/07:90
Joint statement on eGFR, 2/07:90
Impact of 2007 physician payment provisions, 2/07:92
CAP weighs in on IVDMIAs, 3/07:123
What's in the president's proposed budget?, 3/07:123
Pressing for action against anti-kickback violators, 3/07:124
A TC 'grandfather' bill, 3/07:124
For 2007, 17 issues on advocacy agenda, 3/07:124
CMS changes course on pod lab rule, 4/07:95
Illinois court upholds PC billing, 4/07:95
CAP requests an MUE advisory committee, 4/07:95
Bill would permit psychologists to order, interpret lab tests, 4/07:95
In Utah, anti-markup disclosure legislation, 4/07:96
Report issued on SGR reforms, 4/07:96
Cytology legislation introduced in House, 4/07:96
CAP opposes United Healthcare policy, 5/07:118
Phase IV of MUEs released, 5/07:118
A direct billing law in Kansas, 5/07:119
CAP governor to help advise group on genetic test oversight, 5/07:119
Early detection—even more funds needed, 5/07:119
A reminder to participate, 5/07:119
For cytology PT, it's time for legislative solution, 6/07:130
In Texas, mandatory disclosure for AP, 6/07:131
Ruling: HMOs must pay for professional component, 6/07:132
Pressing for SGR adjustment, 6/07:132
Pay-for-performance measures earn consortium's approval, 7/07:126
A request that pathologists be reminded to pay pathologists, 7/07:126
Spending report overlooks impact of chronic conditions, 7/07:126
Malpractice legislation introduced in house, 7/07:127
Practice information survey underway, 7/07:128
Community, regional labs among the many competitive bidding concerns, 8/07:116
Proposed '08 physician fee schedule issued; comments due Aug. 30, 8/07:118
State pathology presidents gather in Washington, 8/07:118
Physician payment part of House-passed bill, 9/07:123
Guidance on IVDMIAs coming into focus, 9/07:123
A bill to repeal competitive bidding demonstration, 9/07:124
Advice for CMS on new and revised CPT codes, 9/07:124
In California, a broader direct billing law, 10/07:110
Pursuing a legislative solution to PT problem, 10/07:110

Close loopholes, change payment method, 10/07:110
Making MUEs public, 10/07:112
Pay-for-performance measures ready for '08, 11/07:140
In Mass., opposition to licensure of lab personnel, 11/07:140
Final fee schedule could end pod labs, 11/07:140
Fight to preserve AFIP continues, 11/07:141
Calling for public release of MUEs, 11/07:141
California governor signs direct billing law, 11/07:141
'Stifling or stimulating?' Congress warned of gene patent dangers, 12/07:84
Groups support health IT, but ask that it be done right, 12/07:84
For genetic testing oversight, no need to look beyond CLIA, 12/07:85

Cardiovascular disease/cardiac markers (see also Heart transplants)

Showing heart patients the way home, 8/07:1
ST2 in the ED: Will it nail cardiac risk?, 12/07:1
Using markers for a head start on heart risk, 12/07:1

Careers/employment

How and why pathologists fail as managers, 9/07:54

Chemotherapy

Breast cancer dilemma: adjuvant chemo—can new assays help?, 3/07:1

Co-mingling of radiology and pathology

In diagnoses, a tale of two specialties, 7/07:1
Two peas in a pod: digital AP, radiology, 10/07:56

Company consolidation (see Joint ventures/company consolidation)

Company profiles/news

In a tough market, why Sunrise Medical shines, 7/07:5
Fast times at the front end—speeding up ED tests, 7/07:72

CPT questions/coding

In CPT 2007, something new for nearly all, 1/07:34
Correct coding for incarcerated omentum resected with the hernia sac and for incarcerated omentum resected at the time of hernia repair, 1/07:83
Should we use CPT code 88305 or 88307 when treating a breast excision for a mass as a possible malignancy that ends up being benign?, 1/07:83
Why '07 reimbursement rates are down six percent, 2/07:12
2007 national physician fee schedule relative value units, 2/07:13
Can code 88172 be used for cases in which a cytotechnologist is present at a fine-needle aspiration performed by a radiologist and assesses specimen adequacy?, 3/07:124
When processing a merkel cell carcinoma left cheek specimen that had cut sections and margins submitted in different cassettes and inked separately, can the specimen be coded to more than code 88305?, 3/07:124
Using code 80500 for interpreting and reporting a peripheral blood smear, 5/07:118

Appropriate use of CPT code 88329, Pathology Consultation during Surgery, 5/07:118
Billing brief: the facts behind FNA codes 88172—88173, 7/07:14
What CPT code should we use for a BRCA1 mutation-positive patient presenting for removal of her right fallopian tube and ovary?, 7/07:127
Should we use CPT code 88307 or 88305 when two separate and distinct nodes are present?, 7/07:127
Can we charge CPT code 83912 more than once if independent procedures, which require separate interpretation, are necessary to produce a final assay result?, 11/07:141
I process some of the material I get from an FPNA by placing it in CytoLyt fixative and making a ThinPrep slide. Can I charge for the FNA using CPT code 88112?, 11/07:141

Cytopathology/histology (see also PAP/NGC programs review)

Billing brief: the facts behind FNA codes 88172—88173, 7/07:14

Cytopathology Programs Review (formerly called PAP/NGC programs review)

Understanding HPV testing's place in primary screening, 1/07:39
'Retrophobia' and the 5-year retrospective review, 1/07:39
A digital slide program in FNAs, 1/07:40
Share your '06 cervical cytology statistics, 1/07:41
ASC-H: HPV data and histologic outcomes, 1/07:46
Vaccines for preventing cervical cancer—where we are now, 1/07:48
Online: gynecologic and nongyn educational programs, 1/07:48
Give and you shall receive, 1/07:50
What is the role of fine-needle aspiration in evaluating thyroid nodules? A review of the new American Thyroid Association guidelines, 5/07:79
Pap PT appeals—how the process works, 5/07:80
Q&A: Is it necessary to perform the validation process on the second of two automated Pap test screening instruments in our lab if the first one was installed in 2002?, 5/07:86
Q&A: Is it necessary to establish a downtime procedure for an automated Pap test screening instrument in case it fails?, 5/07:86
Q&A: Is there a significant difference in error rate diagnosing LGSIL and HGSIL using conventional versus ThinPrep cytology on Pap smears?, 5/07:86
Q&A: Does lubricant affect liquid cervical cytology specimens?, 5/07:90
Q&A: Is there a minimum number of fine-needle aspiration procedures that a pathologist should perform weekly or yearly to maintain competency?, 5/07:93
ASCCP '06 consensus guidelines—what's new and different?, 11/07:93
Non-small cell lung cancer in the targeted therapy era, 11/07:93
How to create a database form for educational slide file sets, 11/07:100
Q&A: What are the FDA requirements to be qualified in the Cytoc ThinPrep Imaging System and BD/Tripath Focal Point Imaging technology?, 11/07:103
Educational cases online twice a year, 11/07:106
FNA or core needle biopsy? Why not both?, 11/07:107
FNA and the Universal Protocol, 11/07:108
Recommended reading: Routine endometrial sampling of asymptomatic premenopausal women shedding normal endometrial cells in Pap tests is not cost-effective, 11/07:110

Digital imaging

View master—an expert eyes digital pathology's future, 9/07:5

Two peas in a pod: digital AP, radiology, 10/07:56

IT challenges don't drown the drum of digital, 11/07:1

Digital pathology

Digital pathology adoption? Expect it in niches, 2/07:58

Digital diagnoses—the shape of things to come, 3/07:1

Like it or not, AP's future will be digitally driven, 3/07:90

Editorials of CAP president (see President's Desk)

Emergency room

Fast times at the front end—speeding up ED tests, 7/07:72

Estimated glomerular filtration rate (eGFR)

Good idea, bad law: requiring eGFR test, 1/07:1

Firsthand Views

What a great meeting feels like, 1/07:94

Moving to the head of the line, 2/07:102

Personality conflicts on the job, 3/07:142

Learning from disappointment, 4/07:110

The accidental jerk, 5/07:130

Savoring words of wisdom, 6/07:150

Resigning and returning, 7/07:146

A little hiring principle, 8/07:130

Management and the lost hours, 9/07:138

In praise of bridge-burners, 10/07:130

How to talk to a CEO, 11/07:154

Morale and faith in management, 12/07:98

Forensic pathology

Why we roll our eyes at shows like *CSI*: Pathologists' reaction to 'Ready, set, action!,'

12/07:64

Future trends

Technologies designing the 'futurescape' of anatomic pathology, 8/07:1

IT challenges don't drown the drum of digital, 11/07:1

Ear to the ground, lab insider spells out the future, 11/07:82

Genetics

What lies ahead in cancer genetics, epigenetics, 1/07:1

Plugging the gaps in PSA testing, 4/07:1

Time to cast a wider net in fragile X testing, 4/07:1

Lynch syndrome testing—when and how?, 12/07:1

Glucose/insulin/blood sugars

Wireless glucose results—the latest in real-time data, 10/07:50

Heart transplants

Heart-to-heart discussion of test's value, use, 11/07:1

HER2

Ask SAM: How well do you do on HER2 testing?, 12/07:5

Histology

Automated histology—many labs, many tales, 10/07:1

Immuno-PCR

PCR and ELISA adaptations—will they fly?, 7/07:1

Independent laboratories

In a tough market, why Sunrise Medical shines, 7/07:5

Information systems, technologies (see also Automation)

Middleware sparks renewed ROI interest, 2/07:1

Middleware systems: redefining middle management, 2/07:16

The lab automation survey demystified, 3/07:22

AP systems' 3 most important features, ROI, and more, 3/07:54

How to pick PO-lab links that are free of kinks (physician office-laboratory links software), 5/07:34

Landing a new LIS, 5/07:60

Handing off critical results—well before things turn critical, 6/07:1

Credit clever middleware for spike in labs' productivity, 6/07:18

Riffing on RFID: tracking a technology high-flier, 6/07:100

Put your money where your money is: choosing the right billing/AR system, 7/07:16

National biovigilance system a (net)work in progress, 10/07:12

What blood bank software can do for biovigilance monitoring, 10/07:16

Blood bank information systems survey, 10/07:18

The next step: bringing autoverification into the blood bank, 10/07:38

IT challenges don't drown the drum of digital, 11/07:1

Selecting an LIS? What to seek and what to skip, 11/07:23

Time to shelve your RFP for an RFI—here's why, 11/07:24

Laboratory information systems survey, 11/07:31

Instrumentation/instrument surveys

In coagulation, the push continues for more and better (coagulation analyzers), 1/07:18

Glucose test frequency spawns new analyzer needs (bedside glucose testing systems), 4/07:22

What vendors are up to in POC and self-testing coag (POC, self-monitoring coagulation analyzers), 5/07:14

Immunoassay marketplace reflects need for integration, 6/07:24

For chemistry analyzers, a lot in the works for '08, 7/07:41

Shop talk: In acquiring lab instruments, the stakes have gotten higher, 7/07:99
New tests, sensors, firmware for blood gas analyzers (in vitro blood gas analyzers), 8/07:22
Blood gas analyzers—the old and the new, 8/07:48
An array of possibilities (chemistry analyzers for low-volume laboratories), 9/07:25
Wireless glucose results—the latest in real-time data, 10/07:50
Hematology analyzers survey, 12/07:21
Aiming to ease lab labor, cost, TAT pressures, 12/07:21

Insulin (see Glucose/insulin/blood sugars)

In vitro diagnostics

IVD, imaging firms peg fortunes on consolidation, 6/07:1
Ear to the ground, lab insider spells out the future, 11/07:82

Joint ventures/company consolidation

IVD, imaging firms peg fortunes on consolidation, 6/07:1

Lab InfoTech Summit

Riffing on RFID: tracking a technology high-flier, 6/07:100

Laboratory Accreditation News: Queries and Comments

Summary of waived testing requirements included in the checklists, 4/07:54
What should inspector look for with regard to TLC.10800, phase II, asking about director interacting with government agencies?, 4/07:55
Meaning of the note for microbiology checklist question MIC.21040 regarding QC, 4/07:55
Necessity of microbiology checklist question MIC.21620, 8/07:71
Necessity of purchasing commercial quality control materials for specific manual tests, 8/07:71
Necessity of reporting the cutoff values for medical urine drug testing, 8/07:75
Understanding chemistry checklist question CHM.15250, 8/07:75
What are the CAP's quality control requirements for the new molecular systems to detect methicillin-resistant *Staphylococcus aureus*, or MRSA?, 12/07:43
Are references available about notifying doctors' offices about high-grade malignancy cases?, 12/07:43
Do I have to vent the microwave oven if it is being used to warm slides or heat simple solutions and is being used in a negative pressure room?, 12/07:48

LAP News

Matching labs for inspection now faster, more objective, 4/07:52
Inspection packets made more user-friendly, 8/07:71
Activity menus: soon to be online and real time, 8/07:78
In checklists, changes of all shapes and sizes, 12/07:43
Point-by-point checklist for POC testing, 12/07:46
CME/CE changes, 12/07:46

Lean manufacturing principles/Six Sigma

Brewing a high-octane laboratory, step by step, 8/07:86

Legal issues (see also Medical mistakes)

Of clouds and silver linings: reflections on *Martis v. Pekin*, 5/07:5

Proficiency testing (see also LAP News/CLA programs)

PT approach for nonregulated tests sets high bar, 7/07:88

PSA testing

Plugging the gaps in PSA testing, 4/07:1

Q&A

When to do a full crossmatch for blood transfusion patients versus an immediate spin test (AuBuchon), 1/07:84

Do we need to use a gas analyzer to monitor daily our CO₂ incubator in microbiology, or is the digital readout sufficient? (Gandy), 1/07:84

Studies on centrifuged serum separator tubes that are sent through a pneumatic tube system to a main laboratory (Kiechle), 2/07:87

Has any use of microarrays been authorized other than for the Roche Amplichip? (Kant), 2/07:87

Is it appropriate in a hospital health system to pool the quality control data and use a single common statistics range for all instruments? (Castellani), 3/07:120

Reusing biohazard bags (Harris), 3/07:120

Analyzing long-term or chronic exposure to toxic heavy metals (Middleberg), 4/07:90

Necessity of doing a cell count and differential on body fluids/CSF on tubes one and four (Galagan), 4/07:90

Necessity of including complete first and last name of individual contacted in reporting a critical value, per CAP laboratory general checklist (Miller-Jones), 5/07:120

How to handle hemolysis in blood samples while strengthening specimen rejection policy (Horowitz), 5/07:120

Antiphospholipid antibody tests in patients with livedo reticularis (Luper), 6/07:134

Appropriate formula to correct the manual CSF WBC count for NRBCs (Novak), 6/07:134

Turnaround time for multiple block frozen sections (Folpe), 7/07:131

Literature on testing blood drawn from an intraosseous line (Kiechle), 7/07:131

How do Sonoclot, PFA-100, and Accumetrics compare in assessing platelet function; does each have an application to assess aspirin, Plavix, and Integrilin? (Luper), 8/07:110

Why is graft-versus-host disease more prevalent among blood recipients from related versus unrelated donors? (AuBuchon), 8/07:110

What liability could we incur by doing QC on flow reports that we do not interpret? (Bierig), 9/07:119

Can the antiphospholipid antibody test be negative in a livedo reticularis patient taking Coumadin for chronic atrial fibrillation? (Van Gott, Mandal), 10/07:114

Time frame after blood collection within which a PT or APTT must be run to ensure accurate results (Fuller, Liechle), 10/07:115

Are hospital patients who are colonized with MRSA simply discharged to return to their nursing homes or other places of residence without treatment or therapy? (Peterson), 11/07:136

What preanalytic factors can influence hematocrit determination? (Novak), 11/07:136

Can you explain why we are required to perform extensive lot change studies for prothrombin time and partial thromboplastin time? Why can't lab coagulation suppliers manufacture a calibrated reagent? (Triscott), 12/07:80
Where would I find information that I can use to set up new guidelines for peripheral smear review and urinalysis reflex testing to culture? (Novak), 12/07:80

Q-Probes and test management

In send-out snafus, it's right place, wrong kind, 4/07:5
