Name of instrument Type of instrument	Alinity ci-series combination chemistry/immunoassay	HELIOS HTC immunoassay	ACE Axcel chemistry
Operational type/Model type	batch, random access, continuous random access, discrete/floor standing	batch/benchtop	batch, random access, continuous random access, discrete/ benchtop
List price/First year sold in U.S.	<del>/2018</del>	\$175,000/2017	\$34,500/2012
Targeted hospital bed size/Targeted test volume Company manufactures instrument	all/— yes	200–1,000/daily: > 25; monthly: > 500; annual: > 5,000 yes	—/daily: ~15–50 comprehensive metabolic panels and lipids yes (also sold by McKesson, Henry Schein, Medline, AvMedical)
Other models in this family of analyzers  No. of units in clinical use in U.S./Outside U.S. (countries)		HELIOS, HELMED /> 350 (> 35 countries)	ACE Alera
Dimensions (H $\times$ W $\times$ D)/Instrument footprint	$4.4 \times 3.9 \times 3.84$ for standalone module; up to $4.4 \times 11.81 \times 3.84$ for 4-module system/14.98–45.31 sq. ft. for 1- to 4-module system	22.5 × 25.6 × 29.6 in./5.25 sq. ft.	$33 \times 28 \times 26$ in./10 sq. ft.
Weight empty/Weight fully loaded No. of different measured assays onboard simultaneously	chem: 1,556 lbs.; immuno: 1,371 lbs./— chem: up to 280 (up to 280 can be run and calibrated at one time); immuno: up to 188 (up to 188 can be run and calibrated at one time)	73 lbs./— 4 (4 can be run and calibrated at one time)	150 lbs./150 lbs. 40 (200 can be run and calibrated at one time)
No. of user-definable (open chemistry) channels Test throughput per hour/Assay run time	10 (10 can be active simultaneously) up to 5,400 for Alinity c 4-module system; up to 800 for Alinity i 4-module system/depends on configuration	=	15 (15 can be active simultaneously) 165/—
Chemistry: No. of direct ion-selective electrode channels Detection methods	3 photometry, potentiometry	_	3 photometry, potentiometry, turbidimetric homogeneous enzyme immunoassay
Stat time until completion/specimen throughput for:  Ion-selective electrode	_	_	4 min./35 specimens per hr.
Basic metabolic panel     Complete metabolic panel	=	=	=
Typical time delay from ordering stat test until aspiration of sample	< 30 sec.	_	10 sec.
Immunoassay: Fully automated microplate immunoassay system Mathodologies supported	NO chamiluminoscopeo	fluoroccopes, indirect fluoroccopt antihody	-
Methodologies supported Separation methodologies Stat time until completion of a 8 bCC test	chemiluminescence magnetic particle	fluorescence, indirect fluorescent antibody coated IFA slide	=
Stat time until completion of a ß-hCG test  Typical time delay from test order to aspiration of sample  Stat time until completion of a aTn test	_ _	_	_
Stat time until completion of a cTn test  Typical time delay from test order to aspiration of sample			00.000/dayday
Approximate No. of tests per reagent set/Reagent type Reagents refrigerated onboard/Reagents ready to use	up to 1,500 (chem), up to 600 (immuno)/self-contained multiuse yes (2°–10°C [chemistry], 2°–12°C [immunoassay])/yes	120/— no/yes	30–900/closed reagent system with open reagent channels yes (10°–14°C)/yes
Reagent lot tracking/Reagent inventory Reagent form/Reagents barcoded	yes/yes liquid chemistry (open reagent system)/yes	yes/no liquid chemistry (closed reagent system)/no	yes/yes liquid chemistry (open reagent system)/yes
Separate reagent pack for each specimen/for each test run Walkaway capability/Walkaway duration	no/no yes/240 min. or up to 600 specimens (150 specimens per module)	no/yes yes/190 specimens or 240 tests	no/no yes/75 min. or 75 specimens or 248 tests
Design of sample-handling system Uses washable cuvettes/Uses disposable cuvettes	6-position rack chem: yes/immuno: yes (can store up to 1,000 cuvettes)	rack no/no	ring no/yes (can store up to 248 cuvettes)
Minmax. sample volume that can be aspirated at one time Min. reaction volume/Min. specimen volume/Min. dead volume	1.5–35 μL (chemistry), 2–200 μL (immunoassay) 80 μL/assay dependent/50 μL	— —/assay dependent/tube dependent	3–200 μL 150 μL/53 μL/50 μL
Dedicated pediatric sample cup Primary tube sampling Accommodates most standard tube sizes/Accepts nonstandard	no yes yes/yes (10–16.1 × 72–102 mm)	no yes yes/yes (11–16 × 55–100 mm)	no yes —
tube sizes Pierces caps on primary tubes	no	no	yes
Protects against probe collision Detects clots/liquid level/short sample	yes yes/yes	yes no/yes/yes	no no/yes/yes
Detection or quantitation for hemolysis, icterus, lipemia, clots	detection for hemolysis, icterus, lipemia, clots; quantitation for hemolysis, icterus, lipemia	hemolysis, icterus, lipemia, clots not available	hemolysis, icterus, lipemia, clots not available
Dilutes patient samples onboard/Susceptibility to carryover Automatic rerun capability	yes/≤ 0.1 parts per million yes	yes/no carryover no	yes (can be programmed to perform dilutions prior to analysis)/—yes
Sample volume can be diluted to rerun out-of-linear-range high results Sample volume can be concentrated to rerun out-of-linear-range low results		yes yes	yes no
Analyzer requires dedicated water supply	yes (27 L/hr. consumption during operation for chemistry, <10 L/hr. for immunoassay)	no	no
Autocalibration/Multipoint calibration supported Typical calibration frequency for ISE/therapeutic drugs/ drugs of abuse/general chemistries/immunoassays	yes (calibrants are stored onboard)/yes 1 day/new lot or 7–45 days/new lot or 13 days/new lot or 30 days/new lot or 30 days	no (calibrants are not stored onboard)/—	yes (calibrants are not stored onboard)/yes 3 hrs./—/—/30 days/—
Automatic programmable start/Automatic programmable shutdown Onboard real-time QC/Onboard software capability to review QC	—/no yes/yes	no/no no/yes	no/no yes/yes
Supports multiple QC lot numbers per analyte Waste management	automated collection onboard instrument or direct to drain		yes automated collection onboard instrument
Sample barcode-reading capability/Autodiscrimination  Lab can control analyzer from remote computer	yes (Interleaved 2 of 5, Codabar, Code 39, Code 128)/yes yes	yes (Interleaved 2 of 5, UPC, Code 39, Code 128, Matrix 2/5, Code 11, EAN/JAN, more)/yes yes	yes (Interleaved 2 of 5, UPC, Codabar, Code 39, Code 128)/yes no
Instrument can diagnose its own malfunctions System malfunctions can be diagnosed via remote monitoring	yes (operator intervention required to order parts) yes	yes	yes (operator intervention required to order parts) no
UPS backup power supply Data-management capability/LIS or EHR systems interfaced LIS interface provided/Bidirectional interface capability Modem servicing provided/Service engineer on-site response time	yes onboard/— no/yes (broadcast download and host query) —/based on contract	yes optional add-on (AESKU.LAB)/Sunquest, Orchard no/yes (host query) no/—	no onboard/CGM LabDaq, Orchard, CGM SchuyLab, LabTrak, more no/yes (host query) yes/24 hrs.
Mean time between failures Average scheduled maintenance time by lab personnel	— (displays error codes for troubleshooting) daily: 0 (chem and immuno); weekly: 30 min. (chem), 16 min. (immuno); monthly: 2 min. (chem), 0 (immuno)	— (displays error codes for troubleshooting) daily: 5 min.; weekly: 20 min.	240 days (displays error codes for troubleshooting) daily: 15 min.; weekly: 20–30 min.; monthly: 30–40 min.
Maintenance records kept onboard for user/vendor Maintenance training demonstration module onboard Training included with purchase/Avg. time for basic user training	some records (includes audit trail of who replaced parts)/no yes yes (2 training slots)/12 hrs. (at customer site)	no/no no yes (1 training slot)/—	yes (includes audit trail of who replaced parts)/no no yes (1 training slot)/4.5 days (at customer and vendor sites
Advanced operator training/Extra charge for follow-up or advanced training	yes (at customer or vendor site)/yes	yes/—	[depends on sales agreement]) no/—
Warranty provided/Cost of annual service contract (24 h/7 d)	yes (varies by contract)/varies by contract	yes (1 year)/—	yes (1 year)/—
Distinguishing features (supplied by company)	compact, flexible, and scalable up to four modules and 14 configurations     harmonized family of systems across key lab disciplines	<ul> <li>provides all-in-one IFA ANA, ANCA, and nDNA slide processing and reading on one instrument</li> <li>FDA cleared to identify seven HEp-2 patterns plus negative</li> </ul>	<ul> <li>self-contained analyzer; closed-tube sampling; stat interrupt capability; onboard sample, reagent refrigeration; ready-to-use reagents; onboard reagent inventory management</li> </ul>
Note: a dash in lieu of an answer means company did not answer question or question is not applicable	<ul> <li>leading to easier cross-training for lab staff</li> <li>broad menu of high-quality assays aligned to CLSI guidelines</li> </ul>	results • utilizes pattern-recognition software and can estimate the endpoint titer	integrated ISE module; no external water source or waste drainage     Internet connectivity allows for external technical support, remote access, and laboratory integration
