Instrument name/First year sold	PAP-8E Platelet Aggregometer/2005	Optical Aggregation Systems Models 490 4+, 490 4+4/2017	Whole Blood Optical Lumi-Aggregation System 700-2, 700-4/2006
List price/Model type	$22,990/benchtop	$11,268–$26,795/benchtop	$19,909–$42,100/benchtop
Dimensions (H × W × D)/Weight/Instrument footprint	21.5–25.5 × 19.5 × 21.7 in./40 lbs./4 sq. ft.	per each 4-channel module: 8.5 × 14 × 15 in./19.3 lbs./1.5 sq. ft.	per each 2-channel module: 8.5 × 14 × 18 in./40 lbs./1.75 sq. ft.
No. of units in clinical use in U.S./Outside U.S. (countries)	>500/>300 (worldwide)	—	—
Composition of installs: Hospital lab/Reference lab/Other	80%/15%/5% (unspecified)	—	—
Targeted daily, monthly, annual test volume	—	—	—
Operational type	batch, random access	discrete	discrete
Country where analyzer designed/Manufactured	U.S./U.S.	U.S./U.S.	U.S./U.S.
Company manufactures instrument	yes (also sold by möLab, Sentinel Diagnostics, Werfen, Alpha Labs, Sysmex, Analis)	yes (also sold via distribution partners)	yes (also sold via distribution partners)
FDA-approved clotting-based tests	—	—	—
FDA-approved chromogenic tests	—	—	—
FDA-approved immunologic tests	ristocetin cofactor activity, HIT/HIPA, RIPA, others	platelet agglutination with ristocetin	platelet agglutination with ristocetin
Other FDA-approved tests	routine platelet aggregation testing, platelet activation, spontaneous platelet aggregation, sticky platelets, washed platelets, others	LTA platelet aggregation, ristocetin cofactor assay	whole blood impedance platelet aggregation, LTA platelet aggregation, platelet dense granule ATP release, ristocetin cofactor assay
User-defined tests in clinical use	—	LTA platelet aggregation, ristocetin cofactor assay	whole blood impedance platelet aggregation, LTA platelet aggregation, platelet dense granule secretion, ristocetin cofactor assay
Tests in development or awaiting FDA 510(k) clearance	—	—	—
Methodologies supported	turbidimetric, immunologic (agglutination, Ab-Ag tests)	turbidimetric for measuring platelet aggregation in PRP and ristocetin cofactor assay	turbidimetric for measuring platelet aggregation in PRP and ristocetin cofactor assay, impedance for measuring platelet aggregation in whole blood
Number of different measured assays onboard simultaneously	255	4–8	2–4
Number of different assays programmed and calib. at one time	255	4–8	2–4
No. of user-definable (open) channels/No. active simultaneously	8/8	4–8/4–8	2–4/2–4
Factor assays require manual manipulation or dilutions	yes (manual manipulation and dilutions)	yes (manual dilutions)	yes (manual dilutions)
Test throughput per hour/Assay run time	80 (up to 720 samples in throughput)/6 min. average	6 (24–48 tests in throughput)/5 min. minimum	6 (12–24 tests in throughput)/6 min. minimum
Design of sample-handling system	manual	manual	manual
Operates on whole blood or spun plasma	spun plasma	spun plasma	whole blood and spun plasma
Reagent type	open reagent system (liquid, lyophilized [reconstituted manually])	self-contained multiuse vials; open reagent system (liquid, lyophilized [reconstituted manually])	self-contained multiuse vials; open reagent system (liquid, lyophilized [reconstituted manually])
Reagent barcode-reading capability	yes, for all tests	no	no
No. of reagent containers held onboard/Reagents ready to use	none/requires operator prehandling	—/requires operator prehandling	—/requires operator prehandling
Reagent lot tracking/Reagent inventory/Reagents refrigerated onboard	yes/no/no	no/no/no	no/no/no
Reagents, consumables loaded without interrupting testing	yes (reagents and consumables)	yes (consumables)	yes (consumables)
Instrument uses proprietary or third-party reagents	user's option	proprietary reagents	proprietary reagents
Maximum time same lot number of reagents can be used	2 years	18 months–3 years	18 months–3 years
Walkaway capability/Walkaway duration	yes/8 specimens or 8 tests	yes/5 min. or 4–8 specimens or 4–8 tests	yes/6 min. or 2–4 specimens or 2–4 tests
Min.–max. specimen volume that can be aspirated at one time	—	250–500 µL	225–500 µL
Min. sample volume required for PT/PTT/Factor VIII activity	—	—	—
Types of disposables used	micro test tubes, micro stir bars, pipette tips, sample tubes, sample tube caps	cuvettes, stir bars, pipette tips	cuvettes, stir bars, disposable electrodes, pipette tips
Primary tube sampling supported/Pierces caps on primary tubes	no/no	no/no	no/no
Accommodates most standard tube sizes/Nonstandard sizes	no/no	no/no	no/no
Sample barcode-reading capability/Autodiscrimination	no/yes	no/no	no/no
Auto tracks product volume/Measures number of tests remaining	no/yes	no/no	no/no
Short sample detection	no	no	no
Clot detection as preanalytical variable in plasma sample	no	no	no
Auto detects adequate reagents for aspiration or analysis	no	no	no
Detection or quantitation for hemolysis, turbidity, icterus, lipemia	detection for hemolysis, turbidity, icterus, lipemia	no	no
Dilutes patient samples onboard	no	no	no
Automatic rerun capability/Auto reflex testing capability	no/no	yes/no	yes/no
Lag time during which hypercoagulable sample not detected	no	no	no
User can adjust reagent volumes/Sample volumes	yes/yes	yes/yes	yes/yes
User can adjust No. of reagents/Sources of reagents	yes/yes	yes/yes	yes/yes
User can adjust incubation times/Reading times	yes/yes	yes/yes	yes/yes
Read time extended for prolonged clotting times	no	yes (selectable on menus)	yes (selectable on menus)
Autocalibration/Calibrants stored onboard	yes/no	yes/no	yes/no
Multipoint calibration supported/Recommended frequency	yes/annually	yes/annually	yes/annually
Stat time to complete all analytes/Throughput per hour for:			
• PT alone	—	—	—
• PT, PTT	—	—	—
• Fibrinogen	—	—	—
• Factor VIII activity assay	—	—	—
• D-dimer	—	—	—
Time delay from ordering stat to aspiration of sample	—	—	—
How labs get LOINC codes for results	email query	email query	email query
Onboard real-time QC/Onboard software capability to review QC	no/yes	yes/no	yes/no
Information that can be barcode-scanned on instrument	reagent lot No.	barcode scanning not offered	barcode scanning not offered
Compatible with laboratory automation systems	no	no	no
Data-management capability/LIS or EHR systems interfaced	onboard/none	onboard/none	onboard/none
Interface supplied by instrument vendor	no	no	no
Results transferred to LIS as soon as test time complete	no	no	no
Bidirectional interface capability	no	no	no
Remote servicing provided/UPS backup power supply	no/no	no/no	no/no
Instrument connections to transfer information	—	—	—
Interface standards supported	—	—	—
Information transferred to data-management software	—	—	—
Avg. time for basic user training	1 day (at customer site or virtually)	—	1.5 days (at customer site)
Approximate scheduled maintenance time	weekly: 15 minutes; monthly: 30 minutes	preventive maintenance and calibration by clinical engineering recommended annually	preventive maintenance and calibration by clinical engineering recommended annually
Maintenance records kept onboard	no	yes	yes
Warranty with purchase/Annual service contract cost (24/7)	yes/$2,050	yes/— (cost dependent on contract)	yes/— (cost dependent on contract)
Distinguishing features (supplied by company)	eight independently operated channels, nine results reported per channel, standard micro volumes; preloaded routine and special test parameters, user-defined test templates and protocols, two-year warranty; includes all-in-one wireless computer, PAP-8E system software, electronic pipette, and Microsoft Office Suite	continuously monitors and regulates temperature and stirring; optical calibration can be performed by laboratory personnel using no-cost water samples; customized color-coding options	3 instruments in 1: whole blood/impedance and PRP/LTA aggregometer plus luminometer to measure platelet ATP release; continuously monitors and regulates temperature and stirring; optical calibration can be performed by laboratory personnel using no-cost water samples

Instrument connections to transfer information	directly to LIS; commercial middleware (RALS, Telcor, UniPOC, Cobas Infinity, DI Data Innovations)	directly to LIS; directly to EHR	data-management system, which in turn connects to LIS; directly to LIS
Interface standards supported	LIS: compliant to CLSI LIS02-A2; POC testing middleware: compliant to CLSI POCT01-A2	—	LAN connection provides FTP result file transfer
Information transferred to data-management software	device unique identifier, operator ID, patient ID, result, QC identifier, date and time of assay start, more	patient ID, result	device unique identifier, patient ID, specimen ID, result
Avg. time for basic user training	up to 5 days (approx. 2 days at vendor office)	1 day (at vendor office, on request)	3 days (at customer and vendor offices)
Approximate scheduled maintenance time	weekly: 3 minutes; monthly: 12 minutes	per shift: <1 minute; daily: <1 minute; weekly: <1 minute; monthly: <3 minutes	per shift: 1 minute; daily: 3 minutes; weekly: 5 minutes; monthly: 15 minutes
Maintenance records kept onboard	yes	no	yes
Warranty with purchase/Annual service contract cost (24/7)	yes/— (cost dependent on contract)	yes/—	yes/—
Distinguishing features (supplied by company)	ultrasound measure of whole blood hemostasis directly measures physical properties of a developing clot; wide range of clinical indications with simplified interpretation allows for better communication; novel technology allows for parameters not available in other systems, e.g. platelet contribution to clot	advanced coagulation diagnostics by selectable dual wavelength optics (405/750 nm) for each measuring channel; more sensitive to interferences from hemolysis, icteric, and lipemic samples; intuitive flexible user software; minimum maintenance, repair times, and costs (incl. printer)	easy-to-use, standalone device with small footprint; onboard user and service software, no external PC required; optimized for small to mid-sized labs

Note: a dash in lieu of an answer means company did not answer question or question is not applicable

Primary tube sampling supported/Pierces caps on primary tubes	yes/yes	yes/yes	yes/yes
Accommodates most standard tube sizes/Nonstandard sizes	yes/yes	yes/yes	yes/yes
Sample barcode-reading capability/Autodiscrimination	yes (Interleaved 2 of 5, Code 39, Code 128)/yes	yes (Interleaved 2 of 5, Code 39, Code 128)/yes	yes (Interleaved 2 of 5, Code 39, Code 128)/yes
Auto tracks product volume/Measures number of tests remaining	yes/yes	yes/yes	yes/yes
Short sample detection	yes	yes	yes
Clot detection as preanalytical variable in plasma sample	yes	yes	yes
Auto detects adequate reagents for aspiration or analysis	yes (aspiration and analysis)	yes (aspiration and analysis)	yes (aspiration and analysis)
Detection or quantitation for hemolysis, turbidity, icterus, lipemia	detection and quantitation for hemolysis, turbidity, icterus, lipemia	detection and quantitation for hemolysis, turbidity, icterus, lipemia	detection and quantitation for hemolysis, turbidity, icterus, lipemia
Dilutes patient samples onboard	yes	yes	yes
Automatic rerun capability/Auto reflex testing capability	yes/yes	yes/yes	yes/yes
Lag time during which hypercoagulable sample not detected	no	no	no
User can adjust reagent volumes/Sample volumes	yes/yes	yes/yes	yes/yes
User can adjust No. of reagents/Sources of reagents	yes/yes	yes/yes	yes/yes
User can adjust incubation times/Reading times	yes/yes	yes/yes	yes/yes
Read time extended for prolonged clotting times	yes (selectable on menus)	yes (selectable on menus)	yes (selectable on menus)
Autocalibration/Calibrants stored onboard	no/no	no/no	no/no
Multipoint calibration supported/Recommended frequency	yes/6 months	yes/6 months	yes/6 months
Stat time to complete all analytes/Throughput per hour for:			
• PT alone	<3 minutes/110 specimens	<3 minutes/240 specimens	<3 minutes/360 specimens
• PT, PTT	<6 minutes/55 specimens	<6 minutes/90 specimens	<6 minutes/165 specimens
• Fibrinogen	<3 minutes/60 specimens	<3 minutes/78 specimens	<3 minutes/108 specimens
• Factor VIII activity assay	8 minutes/38 specimens	8 minutes/77 specimens	8 minutes/100 specimens
• D-dimer	5 minutes/55 specimens	5 minutes/75 specimens	5 minutes/100 specimens
Time delay from ordering stat to aspiration of sample	none	none	none
How labs get LOINC codes for results	functionality not provided	functionality not provided	functionality not provided
Onboard real-time QC/Onboard software capability to review QC	yes/yes	yes/yes	yes/yes
Information that can be barcode-scanned on instrument	specimen identifier, reagent lot No.	specimen identifier, reagent lot No.	specimen identifier, reagent lot No.
Compatible with laboratory automation systems	no	no	yes (HemoCell, Beckman, Siemens, Abbott, Thermo Fisher, others)
Data-management capability/LIS or EHR systems interfaced	onboard/Cerner, CompuLab, CPSI, HBOC, HMS, McKesson, Meditech, Novius, SMS, SCC, Clinisys, Vista	onboard/Cerner, CompuLab, CPSI, HBOC, HMS, McKesson, Meditech, Novius, SMS, SCC, Clinisys, Vista	onboard/Cerner, CompuLab, CPSI, HBOC, HMS, McKesson, Meditech, Novius, SMS, SCC, Clinisys, Vista
Interface supplied by instrument vendor	contract dependent	contract dependent	contract dependent
Results transferred to LIS as soon as test time complete	yes	yes	yes
Bidirectional interface capability	yes (broadcast download and host query)	yes (broadcast download and host query)	yes (broadcast download and host query)
Remote servicing provided/UPS backup power supply	yes/yes	yes/yes	yes/yes
Instrument connections to transfer information	data-management system, which in turn connects to LIS; directly to LIS; commercial middleware (Beckman Coulter)	data-management system, which in turn connects to LIS; directly to LIS; commercial middleware (Beckman Coulter)	data-management system, which in turn connects to LIS; directly to LIS; directly to lab automation system; commercial middleware (Beckman Coulter)
Interface standards supported	ASTM 1394-91	ASTM 1394-91	ASTM 1394-91
Information transferred to data-management software	specimen ID	specimen ID	specimen ID
Avg. time for basic user training	9 days (5 days at customer site, 4 days at vendor office)	14 days (10 days at customer site, 4 days at vendor office)	14 days (10 days at customer site, 4 days at vendor office)
Approximate scheduled maintenance time	daily: <5 minutes; weekly: <10 minutes	daily: <5 minutes; weekly: <10 minutes	daily: <5 minutes; weekly: <10 minutes
Maintenance records kept onboard	yes	yes	yes
Warranty with purchase/Annual service contract cost (24/7)	yes/— (cost dependent on contract)	yes/— (cost dependent on contract)	yes/— (cost dependent on contract)
Distinguishing features (supplied by company)	FDA 510(k) approved; improves patient care, lab efficiencies, and costs; supports lab's policy on sample acceptance with quantitative HIL, sample fill detection, aspiration errors (clots); best-in-class reagents; liquid format for PT/APTT (10-day onboard stability), high specificity D-dimer, on-demand HIT testing	FDA 510(k) approved; improves patient care, lab efficiencies, and costs; supports lab's policy on sample acceptance with quantitative HIL, sample fill detection, aspiration errors (clots); liquid format for PT/APTT (10-day onboard stability), high specificity D-dimer, on-demand HIT testing	FDA 510(k) approved; improves patient care, lab efficiencies, and costs; supports lab's policy on sample acceptance with quantitative HIL, sample fill detection, aspiration errors (clots); liquid format for PT/APTT (10-day onboard stability), high specificity D-dimer, on-demand HIT testing
Note: a dash in lieu of an answer means company did not answer question or question is not applicable			

All information is supplied by the companies listed. The tabulation does not represent an endorsement by the CAP.
