

Percentile distribution of monitoring anticoagulation effect and the degree of anticoagulation achieved

	<i>N</i>	All institution percentiles*				
		10th	25th	50th	75th	90th
Patients with aPTT or anti-Factor Xa obtained within 12 hrs. of heparin administration, %	140	85.5	93.3	98.3	100.0	100.0
Patients with platelet count obtained within 72 hrs. of heparin administration, %	140	66.7	81.7	93.3	100.0	100.0
Patients with at least one therapeutic aPTT or anti-Factor Xa within 24 hrs. of heparin administration, %	140	53.0	67.8	80.0	93.3	100.0
Patients with fewer than two supra-therapeutic aPTT or anti-Factor Xa within 72 hrs. of heparin administration, %	139	11.1	43.8	66.7	78.6	90.0

**Higher percentile ranks indicate better relative performance*
