

## Accumen acquires Chi Solutions, 5/16

**May 2016**—Accumen, a San Diego-based health care services company, has announced the acquisition of Ann Arbor, Mich.-based Chi Solutions, a clinical laboratory consulting and management firm. The acquisition makes Accumen one of the largest companies in the industry focused on improving the speed, accuracy, and efficiency of laboratories across the United States, according to a company statement.

“Accumen’s acquisition of Chi represents the classic story of ‘the whole is greater than the sum of its parts.’ Over my 22 years with Chi, the company has transformed through several iterations. At no time in our history has a partnership been as complementary, as transformative, or as powerful as the combination of Accumen and Chi. This power translates to more value for our clients, better opportunity for our employees, and the creation of a more formidable competitor for our industry,” Kathleen Murphy, PhD, CEO of Chi, said in a statement.
