

ACD and Leica to comarket RNA ISH assays

November 2014—Leica Biosystems and Advanced Cell Diagnostics announced the comarketing of ACD's RNAscope LS ISH assays using Leica's Bond Rx research-use-only staining platform. The agreement provides researchers with an integrated and fully automated ISH solution. The RNAscope LS reagent kits and ISH probes are available from ACD while the Bond Rx instrument and associated reagents are supplied by Leica.
