

Advanced Instruments' osmometer peer group program

June 17, 2019—[Advanced Instruments](#) launched its Web-based Advanced QC Peer Group program, which allows laboratories to compare their osmometer serum and urine QC with their peers' data on a real-time and monthly basis. The program is designed to help laboratories troubleshoot issues by providing instant and monthly reports to evaluate internal and external performance in real time. It also aims to give labs increased assurance in proficiency survey and patient results.

"We are pleased to deliver a program that helps ensure accurate results in patient testing and helps labs troubleshoot and detect issues quickly," Julie MacKenzie, product manager, Advanced Instruments, said in a company press release. "Feedback from usability testing spoke to how simple and intuitive users found the peer group."
