

Agena, Simceredx to develop companion dx, 5/18

May 2018—Agena Bioscience and Simcere Diagnostics signed a strategic partnership agreement to expand the use of Agena's MassArray System for companion diagnostics and pharmacogenetic testing in China.

Simceredx will develop panels to support companion diagnostics for its drug development pipelines in China's hospital system. Simceredx will be supported by Agena's sales team in China to commercialize Agena's high-throughput, 384-well format automated system.
