

Alpha-Tec QC1 malaria slides

written by CAP TODAY

November 19, 2020

November 2020—Alpha-Tec Systems has released quality control slides containing smears of red blood cells infected with a mixture of ring-form, trophozoite, and schizont stages of *Plasmodium falciparum*. The slides are prefixed with methanol and are ready to stain with traditional Giemsa, Wright's, or Field stains.
