

Analytical and workflow systems, 9/15

At the AACC show 2015

Beckman Coulter Diagnostics' booth Beckman Coulter Diagnostics' booth showcased its portfolio of high-productivity analytical and workflow systems.

Solutions featured in the booth included the Power Express automation solution, the new DxH Connected Workcell, and IRIS International urinalysis solutions for automated urinalysis.

Also on display was the MicroScan microbiology portfolio, including the latest addition: the MicroScan WalkAway Plus. This customizable microbiology system provides efficient identification and antibiotic susceptibility testing and scalable specimen processing.

Clinical IT solutions, including the newly released version of Remisol Advance enterprise data-management system and hc1.com, to manage laboratory workflow, standardize operations across hospital networks, and increase productivity were also featured.
