

Anemia calibration verification/linearity test kit, 10/15

Maine Standards Company released its Validate Anemia calibration verification/linearity test kit. The kit contains ferritin, folate, and vitamin B12 in a human-serum base matrix. Each kit is prepared using the CLSI recommended "equal delta" method for linearity testing and is liquid, ready to use. Simply add the product from the dropper bottle directly into a sample cup and run as a patient sample in duplicate or triplicate.
