

BD launches new FacsDiscover A8 configurations

written by CAP TODAY
February 17, 2026

February 2026—BD released new configurations of its FacsDiscover A8 cell analyzers. The three- and four-laser instruments feature BD SpectralFX technology, which allows users to analyze up to 50 or more characteristics of a single cell with optimal resolution and sensitivity, and BD CellView image technology, which enables real-time, high-speed imaging.
