

BD to separate diagnostic business

written by CAP TODAY

March 10, 2025

March 2025—The BD board of directors authorized BD management to pursue a plan to separate BD's Biosciences and Diagnostic Solutions business from the rest of BD. The company says the aim is to enhance strategic focus and growth-oriented investments and capital allocation for BD and the separated business and to enhance value creation for shareholders. The decision was the result of a business portfolio evaluation, launched by BD in early 2024.
