

## Benchtop chemistry analyzer, 4/14

April 2014—Vital Diagnostics launched the Eon 300 benchtop scalable chemistry analyzer for small to midsize physician office labs, satellite labs, and small hospital labs.

The Eon 300 runs up to 500 tests per hour and offers a robust menu, intuitive software, reusable cuvettes, and an all-in-one PC with touchscreen monitor. The product is supported by the company's Elite Laboratory Solutions organization, which consists of customer care representatives, lab care specialists, field service engineers, and laboratory consultants.

The Eon 300 will be sold exclusively by McKesson Medical Surgical.
