Bio-Rad introduces Unity Next Peer QC

Oct. 14, 2022—[Bio-Rad Laboratories](#) has launched Unity Next Peer QC, a quality control peer comparison software that provides instant access to peer reporting and comprehensive quality control data.

A new interface provides enhanced data visualization, the company says, and a guided overview of rules evaluation. New features are automatically introduced into the system to support laboratories' QC processes continuously. Unity Next Peer QC also offers scalable features. New users can get guided support and training from Bio-Rad, and for users of UnityWeb, the company is offering upgrades to access the new system.
