

# Bio-Rad launches second installment in QC workbook series

August 2023—Bio-Rad Laboratories has published the second workbook in a series that offers Professional Acknowledgement for Continuing Education credits. The second installment, titled “Laboratory Quality Control Materials,” focuses on identifying proper QC materials and using and handling them appropriately to help monitor QC testing procedures that produce high-quality patient results. Lab professionals can receive a certificate after successfully completing a short exam at the end of the workbook and earn 2.0 contact hours. It is available free of charge at <https://bit.ly/3plrplT>.
