June 24, 2025—[Bio-Rad Laboratories](#) will present an array of clinical diagnostic-related offerings at this year's Association for Diagnostics and Laboratory Medicine Clinical Lab Expo in Chicago, July 27–31. An industry workshop titled “From Waste to Wow: Optimizing Your Quality Control Workflow” is designed to provide attendees with strategies to streamline QC management across multihospital systems for systemwide efficiency, reduce waste streams in clinical chemistry, and recognize patient-based real-time QC to improve lab QC processes. The event will feature presentations by Joshua Hayden, PhD, section director, clinical biochemistry, Cleveland Clinic; Joe Wiencek, PhD, associate professor of pathology, microbiology, and immunology at Vanderbilt School of Medicine; and John Yundt-Pacheco, MSCS, senior principal scientist at Bio-Rad. Lab professionals can earn P.A.C.E. credits at the workshop.

Bio-Rad will also spotlight innovative technologies supporting laboratory workflows. Lab professionals can take part in live demonstrations of advanced blood-typing systems, high-throughput multiplex assays, and streamlined quality control data management tools. The industry workshop and in-booth demos can be reserved here: <http://bit.ly/45YLml8>.
