

## Biocare Medical launches IVD monoclonal antibody

Biocare Medical released a mouse monoclonal antibody, p16 INK4a, for in vitro diagnostic use in the qualitative identification of the p16 INK4a protein by immunohistochemistry in formalin-fixed, paraffin-embedded human tissues. The p16 INK4a antibody [BC42] is available in a concentrate IVD format to support titration by end users and a predilute IVD format at a preoptimized concentration.
