

# Biofortuna expands its freeze-dried production capacity, 9/14

*At the AACC Show 2014*

**September 2014—Biofortuna announced the expansion of its freeze-dried production service.**

Biofortuna invested in a new, state-of-the-art freeze-drier and additional climate-control units to meet the increased demands of companies that are outsourcing their freeze-dried production of diagnostic kits. The additional freeze-drier and infrastructure almost doubles the company's production capacity.
