

## BRCA1/2 panel, 7/16

**July 2016**—Bioo Scientific has launched the Nextflex BRCA1 and BRCA2 Amplicon Panel for FFPE Illumina-compatible sequencing. The panel detects clinically relevant somatic mutations in DNA isolated from formalin-fixed, paraffin-embedded samples to facilitate variant discovery and confirmation. All components necessary for rapidly generating ready-to-sequence libraries, including primer pairs, library prep reagents, size selection beads, and indexed barcodes are included in the panel.
