

CAP members: Fill out this survey

May 7, 2014—CAP members should now complete the 2014 CAP Practice Characteristics Survey, if they have not already done so. Results from the survey will help the College set advocacy priorities and outline regional market pressures and environmental changes affecting the individual pathologist. After completing the survey, participants will be entered in a weekly prize drawing. If you have questions about the survey, please email CAP-PCSurvey@cap.org.

Please note: CAP members should have received an email invitation to take the survey from the email address of noreply@qemailserver.com. To ensure that institutional firewalls did not block the survey when it arrived, members are encouraged to ask their information technology departments to specify that mail from “@qemailserver.com” be allowed to pass through their spam filters.
