

CE mark for real-time PCR GI panels, 7/15

July 2015—Seegene announced that its Allplex Gastrointestinal Full Panel Assay has received the CE-IVD mark, enabling marketing in Europe and certain other countries. The test is based on Seegene's proprietary MuDT technology for the detection of multiple target genes in a single channel without melt curve analysis. The assay covers 25 bacterial, viral, and parasitic causes of gastrointestinal infectious disease.
