July 30, 2025—[Clinisys](#) has acquired Orchard Software from investment firm Francisco Partners, which bought Orchard in 2019.

Clinisys CEO Michael Simpson said in a press statement that Clinisys has a strategy to create and deliver the next evolution of cloud-based laboratory solutions. “As we continue to pursue excellence in developing both our world-class solutions and our industry expertise, expanding with Orchard’s proven solution in the physician office, reference, and veterinary laboratory space was a clear decision for us,” he said.

The combination of Orchard’s LIS portfolio and Clinisys’ LIMS and diagnostic solutions aims to create new opportunities for customers across North America and in international markets.
