

## Control LQ Glycohemoglobin A1c, 4/14

April 2014—Audit MicroControls added to its line of products the Control LQ Glycohemoglobin A1c—a liquid bi-level reference control consisting of human blood-based solutions. It is intended to simulate human patient whole blood samples for the purpose of monitoring the precision of lab testing procedures for glycohemoglobin A1c. The control has been assayed for Biorad Variant Turbo II, Ortho Vitros, Roche Integra, Siemens Dimension, and Tosoh G7.

Packaged as 8 × 0.5 mL, this liquid product has an open-vial stability of up to 50 days when stored at 2°C–8°C.
