

## Digoxigenin-labeled nucleotides, 4/16

**Enzo Life Sciences now offers Digoxigenin-dUTP** and Digoxigenin-UTP, digoxigenin-labeled nucleotides that are suitable for a variety of molecular biology applications. Digoxigenin-dUTP and Digoxigenin-UTP can be used to produce digoxigenin-labeled nucleic acid probes in a variety of labeling reactions. The resulting digoxigenin-labeled probe can be used in a wide range of hybridization applications including in situ hybridizations, Southern blots, Northern blots, or dot blots.
