

EKF, McKesson distribution agreement

April 2019—EKF Diagnostics has signed a private label distribution agreement with McKesson Medical-Surgical for the company's hand-held, reagent-free hemoglobin analyzer, the DiaSpect. The DiaSpect will be sold by McKesson under its own branded line as the McKesson Consult Hb analyzer.

The analyzer provides accurate hemoglobin measurements (precision: CV \leq 1 percent) within two seconds of when the whole blood-filled cuvette is inserted for analysis.
