

# Environmentally friendly immunoassay reagents, 9/14

***At the AACCC Show 2014***

**September 2014—Eco-Tek products by Kem-En-Tec, distributed in the U.S. by Rainbow Scientific,** reduce the environmental impact of ELISA, blotting, or immunohistochemistry applications by eliminating biological and chemical hazards commonly found in diagnostic assay components, including bovine serum albumin, sodium azide, and harmful organic solvents, without compromising quality, reliability, or stability. Additionally, Kem-En-Tec's WellChampion Blocking and Protection Buffer eliminates two to three steps in ELISA plate production, significantly reducing water waste.
