

FDA-cleared next-gen troponin T test, 6/17

June 2017—Roche received 510(k) clearance for its Elecsys Troponin T Gen 5 STAT blood test for patients with a suspected heart attack. With this clearance, according to a company statement, Roche is the first IVD company in the U.S. to provide next-generation troponin testing for patients as an aid in the diagnosis of myocardial infarction, enabling clinicians to more accurately identify patients experiencing a heart attack.
