

Forensic DNA grade consumables, 7/17

July 2017—Eppendorf introduced its Eppendorf Forensic DNA Grade product line, which complies with the requirements of ISO 18385. This standard specifies requirements for the production of products used in the collection, storage, and analysis of biological material for forensic DNA purposes.

Eppendorf confirms the compliance for every production lot and provides lot-specific certificates. The comprehensive approach of this product line, according to the company, assures an excellent purity and performance level as well as optimized packaging that supports contamination- and error-free handling.

The Forensic DNA Grade products encompass consumables for DNA extraction, sample processing, and PCR setup as well as for sample storage.
