

## Fully automated LC-MS/MS analyzer, 8/17

**August 2017**—Thermo Fisher Scientific introduced its Thermo Scientific Cascadion SM Clinical Analyzer at EuroMedLab 2017 in Athens, Greece. The fully automated liquid chromatography tandem mass spectrometry analyzer is designed for use in a variety of settings, including hospital laboratories, and to provide results for a range of clinical tests. The Cascadion will be commercially available first in Europe and in the United States once regulatory approvals have been received.
