

General Data launches LaserTrack Flex for histology labs

Nov. 29, 2022—[General Data Healthcare](#) launched its LaserTrack Flex cassette printer. The Flex has a footprint of 13" L x 19" W and a capacity that starts at 480 cassettes, with each magazine holding 80 cassettes; it can be upgraded to hold up to 800 cassettes. The standard configuration prints on the face of the cassette and can be upgraded to also print on one or both sides. Cassettes can be loaded on the right or left side of the printer. The laser-imaging technology produces high-definition text and barcodes that deliver a 99 percent first-time scan rate, according to a General Data press release. The Windows-based Flex software can interface with most major LIS or LIMS systems.
