

GenoLogics enters agreement with Illumina, 11/14

November 2014—GenoLogics has been selected by Illumina as the laboratory information management system provider to support customers of the HiSeq X Ten sequencing system. Under the agreement, the companies will provide support for HiSeq X Ten whole-genome workflows and analysis pipelines, including those to be used inside of Illumina. Illumina will be using GenoLogics' laboratory information management system to support its collaboration with Genomics England to sequence 100,000 genomes.
