

How to hang on to your best-of-breed AP LIS

Nov. 2, 2014—A recently released white paper, “Augmenting an Enterprise-Wide HIT System with a Best-of-Breed Anatomic Pathology LIS,” explains the “hidden traps” found in enterprise-wide and limited-function pathology laboratory information system products, and discusses EHR vendors that recognize the importance of a best-of-breed anatomic pathology LIS.

The white paper, released by [NovoPath](#), also explores how four AP laboratories successfully used a best-of-breed AP-specific lab system and evaluates the pathology LIS as a cornerstone of an AP lab’s growth strategy. [Sign up](#) to receive a copy of the paper.
