

High-precision pipettors, 11/13

Denville Scientific's new Ultra EZpette high-precision digital pipettors provide accurate and precise liquid dispensing in an ergonomic design.

Available in pink or blue, with eight models that cover volume ranges from 0.1 µL to 10 mL, the ejector has a "click-to-fix" system to easily adjust tip ejection. The Ultra EZpette also includes a calibration tool for easy in-lab recalibration, dual-volume setting system and volume lock, universal shaft, and durable sealing system for 60,000 cycles.

Fully autoclavable and UV resistant, each pipette features a large, color-coded pipetting push button, comfortable finger hook, contoured handle, and soft spring system to minimize hand fatigue.

All pipettes are tested individually and supplied with a certificate of quality.
