

Human whole-genome sequencing solution, 10/15

Illumina launched Illumina SeqLab, an integrated solution for customers with HiSeq X Systems designed to increase laboratory efficiency for population-scale, human whole-genome sequencing.

Illumina partnered with GenoLogics and Hamilton Robotics to provide this solution, which includes Clarity LIMS X edition, Microlab Star liquid handling robotics, HiSeq Analysis Software v2.0, and Illumina's SeqLab Consulting Service. The Illumina SeqLab plug-and-play solution helps laboratories maximize efficiency, optimize laboratory utilization, and streamline analysis to enable maximum sample throughput in as few as six weeks.
