

IGF-1 assay, 7/13:108

DiaSorin's Liaison IGF-1 assay is a solution for full automation of growth factor testing on a random-access analyzer, for accurately monitoring growth dysfunctions.

The company offers an extensive menu of reliable, fully automated chemiluminescent assays suitable for endocrinology clinics, reference laboratories, hospitals, and physician office laboratories. Patients benefit from rapid and accurate results, and laboratories benefit from fast turnaround time and ease of use with the Liaison assay product portfolio.
