June 10, 2022—[Intermountain Healthcare](#) has chosen [Gestalt Diagnostics](#) and [Hamamatsu Photonics](#) to implement digital pathology across its health care system.

“Combining the flexibility, reliability, and durability of Hamamatsu’s latest generation scanning technology with Gestalt’s highly adaptable and interoperable image management and reporting solution has been an ideal pairing,” Dylan Miller, MD, co-leader of the digital pathology implementation strategy at Intermountain Healthcare, said in a press statement. “We are able to meet diverse and dynamic needs across multiple lab sites and pathology groups in our system as we are rolling out digital pathology because of this tremendous partnership.”

The digital pathology platform incorporates Hamamatsu’s NanoZoomer systems and Gestalt’s PathFlow solution.
