

Intuitive ecosystem for lab support, 9/15

At the AACC show 2015

Sysmex announced its Beyond a Better Box product and services model to deliver a comprehensive and intuitive ecosystem that aims to add value to laboratory hematology operations through next-generation diagnostics, advanced tools and technologies, process optimization, and harmonized support known as BeyondCare.

BeyondCare is system support designed to anticipate the needs of the lab and protect and maintain its investment using an evidence-based approach that keeps the environment operating at continuous peak performance. Focused on preventing problems before they occur, BeyondCare brings new levels of insight, efficiency, and agility to the lab.

Sysmex also showcased two flow cytometers from Sysmex Partec—CyFlow Cube 8 and the CyFlow Space—and featured the Sysmex UF-1000i Automated Urine Particle Analyzer.
