

IVDD CE marking for LC-MS products, 11/15

November 2015—Thermo Fisher Scientific received the in vitro diagnostics device CE mark for its Thermo Scientific Prelude MD HPLC, Endura MD mass spectrometer, and ClinQuan MD software. Available for general in vitro diagnostic use in Europe, clinical laboratories now have access to a high-performance liquid chromatograph, mass spectrometer, and LC-MS software designed and manufactured for in vitro diagnostic use in analyzing patient samples as components of laboratory-developed tests.
