

Machaon offers updated aHUS genetic panel

February 2024—Machaon Diagnostics has updated its genetic panel for detecting atypical hemolytic uremic syndrome. The aHUS genetic panel 3.0 now includes two more genes, for a total of 22, associated with thrombotic microangiopathies, including aHUS, thrombotic thrombocytopenic purpura, C3 glomerulopathy, congenital B12 deficiency, and others. Turnaround time is one week.
