

MALDI-TOF MS microbiology document, 10/17

October 2017—The Clinical and Laboratory Standards Institute has published a microbiology guideline, “M58: Methods for the Identification of Cultured Microorganisms Using Matrix-Assisted Laser Desorption/Ionization Time-of-Flight Mass Spectrometry, 1st ed.” The guideline provides performance, reporting, and quality assurance recommendations for the identification of cultured microorganisms by microbiology laboratory professionals using matrix-assisted laser desorption/ionization time-of-flight mass spectrometry. Recommendations for end-user verification and workflow integration are also included.
