Medical billing software, 9/15

Easy Billing announced the newest version of Easy Billing Professional medical billing software. This version features a simple process for storing ICD-9 to ICD-10 crosswalk codes for viewing and selection along with code alerts and discontinued codes. Accounts receivable is tracked by patient and carrier reports as well as user-based Worklists with scheduled reminders for Claim Tasks. Optional features include auto-payment posting, eligibility tracking, electronic statements with patient payment portal, and collection reports. An HL7 interface to Pathology LIS software is available.
