

Medical-grade refrigerators

May 2019—Helmer Scientific has unveiled its GX Solutions, professional medical-grade refrigerators with OptiCool cooling systems. The refrigerators have been designed for the needs of critical health care applications, such as medication, vaccine, blood, and patient sample storage and offer control in temperature management, noise management, and energy management. Temperature management is offered in uniformity, where temperatures are maintained within $\pm 1^{\circ}\text{C}$ throughout the unit; recovery, in which temperature recovers faster after door openings; and stability, where there are fewer temperature deviations from the set point, the company reports.

GX refrigerators have a noise output of 42 decibels and are Energy Star certified.
