

Microscopes and slides, 11/13

Denville Scientific's new line of microscopes includes basic and advanced models designed to provide maximum optical performance on durable and affordable platforms.

The selection includes epifluorescence and stereo-zoom models as well as models with trinocular camera and video mounts. A range of objectives are available, and all microscopes come with a five-year mechanical warranty.

Denville also offers a variety of microscope slides, including UltraClear positively charged slides, which provide the ideal surface for cell and tissue adhesion and come in a variety of colors and edge styles. UltraClear frosted slides are manufactured using a chemical etching process, providing a smooth surface that will not wear down slide-marking pens. All slides come precleaned and ready for use.
