

MilliporeSigma to manufacture Elypta liquid biopsy kits

written by CAP TODAY
May 19, 2020

May 2020—MilliporeSigma has been selected by Swedish molecular diagnostics company Elypta as the contract manufacturer for Elypta’s clinical diagnostic liquid biopsy kits. The kits analyze metabolites deregulated in several cancer types and will initially be made available for research use only. They are intended for mass spectrometry systems and will allow qualified researchers to measure the full spectrum of human glycosaminoglycans in body fluid samples.
