

New book in *Foundations in Diagnostic Pathology* series

September 2023—*Differential Diagnoses in Surgical Pathology: Tumors and their Mimickers*, a new volume in the *Foundations in Diagnostic Pathology* series, has been published by Elsevier. The book, by Fadi W. Abdul Karim, MD, MEd, and Charles Sturgis, MD, aims to help readers quickly differentiate entities that have similar, overlapping histopathologic features and guide them through the decision-making process, providing a road map to the main differential diagnostic considerations that must be addressed when formulating a diagnosis. The book includes high-quality illustrations of similar-looking but distinct entities for side-by-side comparison in a user-friendly format with at-a-glance boxes and tables throughout the text, as well as selected references for further study. An enhanced ebook version is included with purchase.
